

INDEX

Sr. No.	TITLES	Page No.
1.	INTRODUCTION	1-29
1.1.	General Introduction	1
1.2.	Dyes	2
1.3.	Environmental concern	10
1.4.	Treatment of textile wastewaters	12
	1.4.1. Physical treatments	12
	1.4.2. Chemical treatments	13
	1.4.3. Biological Treatments	15
1.5.	Enzymes involved in biodegradation	21
	1.5.1. Lignin peroxidase (EC 1.11.1.14)	22
	1.5.2. Laccase (E.C.1.10.3.2)	23
	1.5.3. Tyrosinase (EC 1.14.18.1)	25
	1.5.4. Reductase	25
1.6.	<i>Galactomyces geotrichum</i>	26
1.7.	Consortium used for dye decolorization	27
1.8.	Objective of the research and thesis outline	29
2	MATERIALS AND METHODS	30-42
2.1.	Chemicals, microorganisms and culture conditions	30
2.2.	Development of consortium-GB	31
2.3.	Decolorization experiments	31
2.4.	Effect of physicochemical parameters on decolorization	33
2.5.	Preparation of cell free extract	34
2.6.	Enzyme assays	35
2.7.	Extraction and analysis of metabolites	36
2.8.	Phytotoxicity	37
2.9.	Partial purification of laccase	38
2.10.	Textile effluent deolorization by consortium-GB	41
2.11.	Statistical Analysis	42
3	RESULTS AND DISCUSSION	43-114
3.1.	Biotransformation enzymes in microorganisms used for consortium-GB	44
3.2.	Decolorization experiment by using <i>Galactomyces geotrichum</i> MTCC 1360	47
3.3.	Decolorization experiment by using consortium-GB	50
3.4.	Study of physicochemical parameters for decolorization of Methyl red and Scarlet RR by <i>Galactomyces geotrichum</i>	55

Index

	MTCC 1360	
3.5.	Study of physicochemical parameters for decolorization of Brown 3REL and Brilliant Blue G by consortium-GB	60
3.6.	Enzyme activities	64
3.7.	Analysis of metabolites	69
3.8.	Partial purification of laccase (EC 1.10.3.2, p-diphenol: oxygen-oxidoreductase)	107
3.9.	Textile effluent deolorization by consortium-GB	112
4	SUMMARY AND CONCLUSIONS	115-123
5	REFERENCES	124-146
6	RESEARCH PUBLICATION	147
