
Acknowledgement

The following thesis, while an individual work, benefited from the insights and direction of several people. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

The first person I would like to thank is my research guide Dr. (Mrs.) Jayashree M. Nagarkar. During my years as a Ph.D research scholar, I have known her as a sympathetic and principle-cantered person. I owe her lots of gratitude for having me shown this way of research. Especially, the strict and extensive comments and the many discussions and the interactions with Madam had a direct impact on the final form and quality of this thesis.

I would like to thank Prof. Bhalchandra M. Bhanage, Head, Department of Chemistry for providing me facilities in Department. I would like to thank Prof. Shrinivas D. Samant and Prof. Radha V. Jayaram for their support. I would like to thank my teachers Dr. R. Manjarekar and Dr. J. V. Patil at D. G. Ruparel College for guiding me during the most crucial path of my career. I thank my lab mates who gave me the feeling of being at home at work and for providing a wonderful atmosphere in the laboratory.

I am thankful to University Grant commission for providing me fellowship during my Ph.D. program. I am grateful to SAIIF, IIT Bombay for providing me the necessary instrumentation facilities.

I feel a deep sense of gratitude for my late father and my mother who formed the part of my vision and taught me the good things that really matter in life. Their teachings provided a persistent inspiration for my journey in this life. I am grateful to my sisters for their love, support and motivation.

Last but not least I like to sincerely acknowledge almighty "Sri Siddhivinayak and Sri Swami Samartha" for bestowing me every moment of life.

Sandeep M. Agawane
