

CONTENTS		Page No.
Chapter 1 Introduction		
1.1	Introduction to Catalysis	2
	1.1.1 Types of Catalysis	4
	1.1.2 Parameter to Measure Catalysis Performance	8
	1.1.3 Advantages of heterogeneous catalyst	11
1.2	Nanotechnology and Nanomaterials	13
	1.2.1 Types of Nanomaterials	15
	1.2.2 Synthesis of Nanomaterials	16
	1.2.3 Characterization of Nanomaterials	21
	1.2.4 Catalysis by Nanomaterials	26
	1.2.5 Applications of Nanomaterials in Catalysis	28
1.3	Objectives of the current research work	35
1.4	References	36
Chapter 2 Nanocrystalline photocatalytic treatment for degradation of dichlorvos by using nano TiO₂		
2.1	Introduction	40
2.2	Experimental: Material and methods	45
2.3	Result and Discussion	52
2.4	Conclusions	59
2.5	References	60

Chapter 3 Degradation of methyl orange and rhodamine B by using novel nano MgO/ZnO catalyst		
3.1	Introduction	63
3.2	Experimental: Material and methods	69
3.3	Result and Discussion	76
3.4	Conclusions	84
3.5	References	85
Chapter 4 Nano Ceria catalyzed synthesis of α-Aminophosphonates under ultrasonication		
4.1	Introduction	89
4.2	Experimental: Material and methods	95
4.3	Results and Discussion	100
4.4	Conclusion	108
4.5	Spectral data	109
4.6	References	112
Chapter 5 Nano ceria catalyzed O, N arylation with 4-Nitrochlorobenzene		
5.1	Introduction	117
5.2	Experimental: Material and methods	126
5.3	Results and Discussion	128
5.4	Conclusion	137
5.5	Spectral data	138
5.6	References	141
Chapter 6 Reduction of nitro compound by using nano Pd/CeO₂ catalyst		

6.1	Introduction	145
6.2	Experimental: Material and methods	151
6.3	Results and Discussion	157
6.4	Conclusion	170
6.5	Spectral data	171
6.6	References	174
Chapter 7 Synthesis of 5-substituted 1<i>H</i>-Tetrazole using nano ZnO/Co₃O₄ catalyst		
7.1	Introduction	178
7.2	Experimental: Material and methods	185
7.3	Results and Discussion	194
7.4	Conclusion	200
7.5	Spectral data	201
7.6	References	204
Conclusion and Future Outlook		206
Publications, Presentation and Awards		208
Synopsis		211

ABBREVIATIONS

aq.	Aqueous
°C	Degree Celsius
FT-IR	Fourier Transform Infra Red
GC	Gas Chromatograph
GC-MS	Gas Chromatograph - Mass Spectrometer
g	Gram
h	Hour
Lit	Litre
mp	Melting point
mmol	Millimole
mL	Millilitre
min	Minute
MW	Microwave
NMR	Nuclear Magnetic Resonance
r.t.	Room Temperature
T	Temperature
TBAB	Tetrabutyl ammonium bromide
(((Ultrasound
