Section	Title	Pg. No.
	List of Figures	xi-xv
	List of tables	xvi-xvii
	List of Abbreviations	xvii-xxi
	Abstract	xxii-xxiv
	Synopsis	xxv-xxxiii
1.0	INTRODUCTION	1-8
2.0	REVIEW OF LITERATURE	9-105
2.1	Utilization of chlorinated compounds by microorganisms	10
2.2	Energy Metabolism	13
2.3	Cometabolism	14
2.4	Aerobic Degradation	15
2.5	Anaerobic Degradation	25
2.6	Sequential Degradation	26
2.7	Role of Electron Donors in Dechlorination	27
2.8	Role of Electron Acceptors in Dechlorination	28
2.9	Role of Transition Metal Cofactors in Dechlorination	29
2.10	Enzymes involved in dechlorination	30
2.11	Evidence of Enzyme-mediated Degradation of Xenobiotic Compounds	39
2.12	Plants and their associated enzymes as decontaminating agents	41
2.13	Genes Mediating Xenobiotic Degradation in bacteria	44
2.14	Catabolic enzymes of degradation pathways	49
2.15	Aromatic Ring-Cleavage Dioxygenase	57
2.16	Catabolic genes and their manipulations	60
2.17	Regulation of catabolic gene action	68
2.18	Conclusion	73

Section	Title	Pg. No.
	CHAPTER 1	107-232
	PURIFICATION AND CHARACTERIZATION OF DDT DEHYDROHALOGENASE	
3.1	Introduction	107
3.2	Experimental	108
3.3	Media and reagents	108
3.4	Methods	118
3.5	Culture Conditions	126
3.6	Purification of DDT- dehydrohalogenase enzyme	127
3.7	DDT- dehydrohalogenase Enzyme assay	127
3.8	Protein estimation	128
3.9	Sub cellular localization of the enzyme	128
3.10	Capillary electrophoresis	129
3.11	High Performance Liquid Chromatography	129
3.12	Polyacrylamide gel electrophoresis (PAGE)	130
3.13	Results and discussion	141
3.14	Discussion	171
3.15	Conclusions	176
	EFFECT OF DENATURANTS ON THE STRUCTURE AND ACTIVITY OF DDT DEHYDROHALOGENASE	
3A.1	Introduction	183
3A.2	Materials and methods	184
3A.3	Results	187
3A.4	Discussion	197
	INFLUENCE OF METAL IONS ON DDT DEHYDROHALOGENASE ACTIVITY	
3B.1	Introduction	203
3B.2	Materials and methods	204
3B.3	Results	207
3B.4	Discussion	214

Section	Title	Pg. No.
3B.5	Conclusions	216
	AN IMMOBILIZED DEHYDROHALOGENASE BASED POTENTIOMETRIC BIOSENSOR FOR THE DETECTION OF DDT	
3C.1	Introduction	219
3C.2	Materials and methods	220
3C.3	Isolation and purification of DDT -dehydrohalogenase enzyme	221
3C.4	DDT-dehydrohalogenase enzyme assay	221
3C.5	Immobilization of enzymes	222
3C.6	Extraction of DDT from water samples	222
3C.7	Fabrication of biosensor system	222
3C.8	Calbration of the sensor electrode	224
3C.9	Results	224
3C.10	Discussion	229
3C.11	Conclusions	231
	CHAPTER 2	233-269
	CLONING AND EXPRESSION OF DDT - DEHYDROHALOGENASE GENE IN SUITABLE HOSTS	
4.1	Introduction	233
4.2	Materials	234
4.3	Reagents and buffers	234
4.4	Methods	237
4.5	Results	251
4.6	Discussion	259
4.7	Conclusions	264
	MOLECULAR MODELLING OF DDT- DEHYDROHALOGENASE	
4a.1	Introduction	270
4a.2.0	Materials and methods	271
4a.2.1	Softwares	271
4a.3.0	Results	274
4a.4	Discussion	302

Section	Title	Pg. No.
4a.5	Conclusions	309
	SUMMARY AND CONCLUSIONS	313-317
