

LIST OF TABLES

Table No.	Title of table	Pg. No.
1.1	Organic, inorganic and air-pollutants possibly encountered in the environment	1
2.1	Major Chlorinated Hydrocarbons (HC) and Their Applications	10
2.2	Microorganisms responsible for pesticide degradation	16
2.3	Bioconversion of xenobiotics effected by <i>Pseudomonads</i>	23
3.1	Results of various tests for the identification of the members of the DDT-degrading consortium	144
3.2	Biovar classification of <i>Pseudomonas fluorescens</i>	146
3.3	Purification chart of DDT- dehydrohalogenase enzyme	150
3.4	Table of characteristic IR bands	157
3.5	Amino acid side chain vibrations	159
3.6	Effect of inhibitors and detergents	165
3.7	Effect of metal salts on dehydrohalogenase activity	165
3.8	Specificity of DDT- dehydrohalogenase enzyme	166
3.9	AAS analysis of metals	168
3.10	Effect of glutathione(reduced) on DDT- dehydrohalogenase activity	169
3A.1	The percentage of α - helix, β - sheets, turns and random calculated using CD spectra	196
3B.1	K_i of the DDT- dehydrohalogenase enzyme when exposed to different concentrations of metal ions	210
3B.2	Effect of metal ions on the secondary structure content of DDT-Dehydrohalogenase	214
4.1	Nucleotide sequences of the primers used for screening DDT- <i>dh11</i> producing bacterial species	239
4.2	Components of DIG kit.	247
4.3	Restriction enzymes used for digestion	248
4a.3.1	Amino acid composition of DDT-dehydrohalogenase	280
