<b>Chapter 1 INTRODUCTION</b>	<b>1</b>
1.1 Basic Concepts of Polymers	1
1.2 Polymers and Polymerization	1
1.3 Classification of Polymers	2
1.4 Types of Polymerization	3
1.5 Polymerization Techniques	4
1.6 Ultrasound –The Wonder Mechanical Wave	4
1.7 Interesting Features of Ultrasound in Polymer Synthesis	10
1.8 Decomposition of Peroxodisulphate (PDS) in the Presence of Ultrasound	14
1.9 Peroxo Salts as Initiator for Polymerization	15
1.10 Photoacoustic Spectroscopy	19
1.11 TGA-DTA,DSC Studies on Polymers	21
1.12 X-Ray Photoelectron Spectroscopy Studies on Polymers	22
1.13 Atomic Force Microscopic Studies (AFM) on Polymers	24
1.14 Electrically Conducting Polymers	25
1.15 Factors Influencing the Transport Properties of Polymers	27
1.16 Models of Charge Transport in Conducting Polymers	33
1.17 Scope of the Investigation	46
References	50

<b>Chapter 2 MATERIALS PREPARATION AND CHARACTERIZATION METHODS</b>	<b>65</b>
2.1 Purification of Chemicals	65
2.2 Low Power Ultrasonic Interferometer	66
2.3 High Power Ultrasonic Water Bath	67
2.4 PMA Sample Prepared using Low Power Ultrasound	68
2.5 PMA Samples Synthesized using High Power Ultrasound	68
2.6 Ultrasound Power Measurements	70
2.7 Synthesis of PMMA- MMT Clay Nanocomposites	71
2.8 Characterization and Measurement Techniques	72
2.9 Density Measurements	76
2.10 Differential Scanning Calorimetry (DSC)	76
2.11 Thermal Expansion	77
2.12 Thermogravimetric Analysis (TGA)	78
2.13 Sinclair's 'Apparatus-Method of Mixtures	78
2.14 X-Ray Diffraction	80
2.15 Atomic Force Microscope (AFM)	81
2.16 Scanning Electron Microscopy and Energy Dispersive X-Ray	83
2.17 X-ray Photoelectron Spectroscopy (XPS)	85
2.18 DC Electrical Resistivity Measurements	87
References	91
<b>Chapter 3 LOW POWER ULTRASOUND MEASUREMENTS</b>	<b>92</b>
3.1 Decomposition Studies of Peroxodisulphate (PDS)	92
3.2 Polymerization Kinetics Measurements of Methyl Acrylate (MA)	93
3.3 Thermal Diffusivity	95
3.4 Thermal Effusivity	96
3.5 PA Measurement of Thermal Diffusivity and Effusivity of PMA	97
3.6 Polymerization of Methyl Acrylate in the Presence of Ultrasound and Peroxodisulphate	98
3.7 Thermal Expansion of PMA	99
References	102

<b>Chapter 4 HIGH POWER ULTRASOUND MEASUREMENTS</b>	<b>103</b>
4.1 Photoacoustic Measurements	103
4.2 Thermal Diffusivity by Photoacoustic Phase and Amplitude Measurements for PMA Synthesized Using High Power Ultrasound	104
4.3 Specific Heat Capacity Measurements (using Sinclair's Apparatus)	106
4.4 Determination of Thermal Diffusion Co-efficient and Thermal Diffusion Length	106
4.5 TGA, DTA and Ultrasonication Period for High Power PMA	107
4.6 X-Ray Photoelectron Spectroscopy Measurements	107
4.7 Atomic Force Microscopy Measurements	108
4.8 X-Ray Diffraction Measurements	108
References	109
<b>Chapter 5 AFM STUDIES ON SONOCHEMICALLY SYNTHESIZED PMA</b>	<b>110</b>
5.1 Introduction	110
5.2 AFM Instrument	111
5.3 Vander Wall's Interaction Governs AFM	114
5.4 AFM Images of PMA Synthesized by Low Power Ultrasound	116
5.5 AFM Images of PMA Synthesized by High Power Ultrasound	119
5.6 Conclusions	127
Reference	128
<b>Chapter 6 THERMAL PROPERTIES OF PMMA/MONTMORILLONITE CLAY NANOCOMPOSITE</b>	<b>129</b>
6.1 Introduction	129
6.2 Experimental	129
6.3 Results and Discussion	131
6.4 Conclusion	138
References	139
<b>Chapter 7 INSTRUMENTATION</b>	<b>140</b>
7.1 Construction of a Low Cost Photoacoustic Spectrometer for Characterization of Materials	140

7.2	Results and Discussion	147
7.3	Digitalized Screw Gauge with Motor Arrangement for Ultrasonic Interferometer (DSMU)	149
7.4	Conclusions	151
	References	153
<b>Chapter 8 RESULTS, DISCUSSION AND CONCLUSIONS</b>		<b>154</b>
8.1	Sonochemical Decomposition Studies of PDS	154
8.2	Polymerization of Methyl Acrylate in the Presence of Low Power Ultrasound and Peroxodisulphate	166
8.3	PA Measurements on PMA Synthesized by Low Power Ultrasound	178
8.4	Variation of Thermal Diffusivity with Sonication Period for PMA Synthesized by High Power Ultrasound	183
8.5	Variation of Thermal Effusivity with Sonication Period For PMA Synthesized By High Power Ultrasound by PA Amplitude and Phase Measurements	198
8.6	Determination of Thermal Diffusion Co-efficient and Thermal Diffusion Length	204
8.7	Sonication Period and Glass Transition Temperature of PMA	206
8.8	Sonication Period and Glass Fragility for PMA	207
8.9	Sonication Period and Thermal Degradation of PMA by TGA/DTG Studies	208
8.10	Electrical Conductivity Studies	215
8.11	Conclusions	230
	References	231
