	Page No.
SYNOPSIS	(i) – (v)
Chapter – I	
INTRODUCTION	
1.1. Theory of General Relativity	1
1.2. Bimetric theory of Relativity	7
1.3. Higher dimensions	12
1.4. Cosmological models	13
1.5. Bianchi Models	15
1.6. Plane Symmetry	22
1.7. Takeno's Exposition of Plane Gravitational Waves	23
Chapter – II	
BIANCHI TYPE-I MESONIC COSMOLOGICAL MODEL IN FIVE DIMENSIONAL BIMETRIC THEORY OF RELATIVITY	
2.1. Introduction	28
2.2. Scalar meson field	30
2.3. Five dimensional perfect fluid distribution coupled with massive scalar field	35
Appendix	39

Chapter-III

BIANCHI TYPE-III MESONIC COSMOLOGICAL MODEL IN FOUR AND FIVE DIMENSIONAL BIMETRIC THEORY OF RELATIVITY

3.1.	Introduction	42
3.2.	Bianchi type-III cosmological model in four dimensional space-time	43
3.3.	Perfect fluid distribution coupled with massive scalar field	45
3.4.	Bianchi type – III cosmological model in five dimensional space-time.	48
3.5.	Perfect fluid distribution coupled with massive scalar field	50
	Appendix	52

Chapter – IV

NON EXISTENCE OF PLANE-SYMMETRIC COSMOLOGICAL MODELS IN BIMETRIC THEORY OF RELATIVITY

4.1.	Introduction	56
4.2.	The field equations	56
4.3.	A special case	59
	Appendix	62

Chapter – V

A NON-STATIC PLANE SYMMETRIC SPACE-TIME IN GENERAL AND BIMETRIC RELATIVITY THEORY

5.1. Introduction	66
5.2. General relativity Case	67
5.2(a). Material distribution	72
5.3. Bimetric relativity Case	73
5.3(a). Material distribution	75
5.3(b). Electromagnetic distribution	75
5.3(c). Special cases	76
Appendix [5.2.1]	78
Appendix [5.3.1]	81

Chapter – VI

PLANE WAVE SOLUTIONS IN BIMETRIC THEORY FOR N-DIMENSIONAL SPACE-TIME

6.1. Introduction	88
6.2. Plane waves	88
Appendix	94
REFERENCES	97
