

CONTENTS

| | | |
|-----------|---|----------|
| 1. | INTRODUCTION | 1 |
| 2. | REVIEW OF LITERATURE | 4 |
| 2.1 | Pre-genomic studies in <i>Z. mobilis</i> | 4 |
| 2.2 | Pre-genomic studies of lactose metabolism in <i>Z. mobilis</i> | 5 |
| 2.3 | Pre-genomic studies of beta-lactam resistance in <i>Z. mobilis</i> | 7 |
| 2.4 | Genome sequence of <i>Z. mobilis</i> | 7 |
| 2.5 | Metabolic pathway reconstruction studies in <i>Z. mobilis</i> | 7 |
| 2.6 | Transcript and metabolic studies in <i>Z. mobilis</i> | 8 |
| 2.7 | <i>in silico</i> and systems biology studies in <i>Z. mobilis</i> | 11 |
| 2.8 | Bioinformatics approach in Post-genomics studies | 13 |
| 2.8.1 | Protein sequence and structure databases | 13 |
| 2.8.2 | Protein family databases | 13 |
| 2.8.3 | Similarity search algorithms and programs | 14 |
| 2.8.4 | Functional motif search compendium and servers | 14 |
| 2.8.5 | Protein family and scheme databases | 15 |
| 2.8.6 | Enzyme databases | 15 |
| 2.8.7 | Multiple sequence alignment algorithms, programs and databases | 15 |
| 2.8.8 | Functional domain search databases | 16 |
| 2.8.9 | Physico-chemical, bio-chemical and bio-physical properties prediction tools and databases | 16 |
| 2.8.10 | Sub-cellular localization and functional categorization tools | 17 |
| 2.8.11 | Signal peptide and cleavage site prediction tools | 18 |
| 2.9 | Antibiotic Resistance in non-pathogenic bacteria | 18 |
| 2.10 | Bacterial cellulose synthesis | 20 |
| 2.10.1 | Biochemical detection of bacterial cellulose synthesis | 21 |
| 2.10.2 | Cellulose synthase operon genes | 21 |
| 2.10.3 | Cellulose synthase catalytic subunit | 21 |
| 2.10.4 | Cellulose synthase regulator protein | 22 |

| | | |
|-----------|--|-----------|
| 2.11 | Beta-galactosidase | 22 |
| 2.11.1 | Cold-active and thermostable beta-galactosidases | 23 |
| 2.11.2 | Immobilization of beta-galactosidase | 26 |
| 2.11.3 | Notable industrial applications of beta-galactosidase | 29 |
| 2.11.4 | Galacto-oligosaccharides production by beta-galactosidase | 30 |
| 2.11.5 | Role of beta-galactosidase in whey utilization | 38 |
| 2.11.6 | Medical and veterinary applications of beta-galactosidase | 41 |
| 3. | MATERIALS AND METHODS | 44 |
| 3.1 | Materials | 44 |
| 3.2 | Bacterial culture conditions | 48 |
| 3.3 | Recombinant DNA techniques | 49 |
| 3.4 | Protein estimation | 49 |
| 3.5 | Estimation of minimum inhibitory concentrations of β -lactam antibiotics | 49 |
| 3.6 | Disk diffusion assay of β -lactam antibiotics | 49 |
| 3.7 | Atomic force microscopy of <i>Z. mobilis</i> and the extracellular cellulosic material | 49 |
| 3.8 | Transcript analysis of beta-lactamases, cellulose synthase operon genes and beta-galactosidase | 50 |
| 3.9 | SDS-PAGE and Zymogram analysis of beta-lactamases | 51 |
| 3.10 | Beta-lactamase assay | 51 |
| 3.11 | Beta-galactosidase assay | 52 |
| 3.12 | Determination of cellulose synthesis in <i>Z. mobilis</i> | 52 |
| 3.12.1 | Congo Red Assay | 52 |
| 3.12.2 | Calcofluor Assay | 52 |
| 3.12.3 | Acetic-nitric (updegraff) cellulose assay | 53 |
| 3.13 | Determination of copy number of beta-galactosidase | 53 |
| 3.14 | Preparation of <i>Z. mobilis</i> competent cells | 54 |
| 3.15 | Electrotransformation of <i>Z. mobilis</i> | 54 |
| 3.16 | Purification and characterization of beta-galactosidase | 55 |

| | | |
|-------------|---|-----------|
| 3.17 | Preparation of cellular fractions of <i>Z. mobilis</i> | 56 |
| 4. | RESULTS | |
| 4.1 | Computational and functional analysis of beta- lactam resistance in <i>Zymomonas mobilis</i> | 58 |
| 4.1.1 | Sequence analysis of β -lactam resistance determinants | 58 |
| 4.1.2 | BlastP analysis of β -lactam resistance determinants | 61 |
| 4.1.3 | Predicted properties of β -lactam resistance determinants | 63 |
| 4.1.4 | Sub-cellular localization and protein classification analysis of β -lactam resistance determinants | 63 |
| 4.1.5 | Conserved domain analysis of β -lactam resistance determinants | 64 |
| 4.1.6 | Functional relationship of β -lactam resistance determinants across genomes | 65 |
| 4.1.7 | Motifs of β -lactam resistance determinants | 68 |
| 4.1.8 | The KEGG pathway analysis of beta-lactam resistance in <i>Z. mobilis</i> | 70 |
| 4.1.9 | Functional relationship of β -lactamases and related proteins | 71 |
| 4.1.10 | Homology modelling and docking | 73 |
| 4.1.11 | Comparison of homology modelled structures | 76 |
| 4.1.12 | Determination of MIC values of β -lactam antibiotics for <i>Z. mobilis</i> | 80 |
| 4.1.13 | Determination of β -lactam resistance profile for <i>Z. mobilis</i> | 81 |
| 4.1.14 | Effect of beta-lactam antibiotic upon <i>Z. mobilis</i> cell structure | 82 |
| 4.1.15 | β -lactamase in the cell fractions of <i>Z. mobilis</i> | 83 |
| 4.1.16 | Transcript analysis of beta-lactam resistance determinants | 83 |
| 4.1.17 | Expression and zymogram analysis of the β -lactamases | 85 |
| 4.2. | Computational analysis of cellulose synthase operon and functional study of the cellulose production in <i>Zymomonas mobilis</i> | 87 |
| 4.2.1 | Sequence analysis of cellulose synthase operon genes | 87 |
| 4.2.2 | BlastP analysis of cellulose synthase operon genes | 87 |
| 4.2.3 | Predicted properties of cellulose synthase operon genes | 88 |

| | | |
|---------|---|-----|
| 4.2.4 | Sub-cellular localization prediction of cellulose synthase operon gene products | 89 |
| 4.2.5 | Conserved domain analysis of cellulose synthase operon | 89 |
| 4.2.6 | Motifs of cellulose synthase operon genes | 91 |
| 4.2.7 | Functional relationship of cellulose synthase operon genes and related proteins | 95 |
| 4.2.8 | Determination of cellulose synthesis in <i>Z. mobilis</i> | 96 |
| 4.2.8.1 | Congo Red Assay | 96 |
| 4.2.8.2 | Calcofluor Assay | 96 |
| 4.2.8.3 | Fluorescence Microscopy | 97 |
| 4.2.8.4 | Atomic force Microscopy | 98 |
| 4.2.8.5 | Acetic-nitric (updegraff) cellulose Assay | 98 |
| 4.2.9 | Transcript analysis of cellulose synthase operon genes | 99 |
| 4.3. | Computational analysis and functional characterization of beta-galactosidase in <i>Zymomonas mobilis</i> | 100 |
| 4.3.1 | Sequence analysis of beta-galactosidase | 100 |
| 4.3.2 | Sub-cellular localization of beta-galactosidase | 101 |
| 4.3.3 | Conserved domain, Promoter and RBS analysis of beta-galactosidase | 102 |
| 4.3.4 | Motifs of beta-galactosidase | 105 |
| 4.3.5 | The KEGG pathway analysis of beta-galactosidase | 106 |
| 4.3.6 | Homology modelling and docking | 107 |
| 4.3.7 | Determination of copy number of beta-galactosidase | 108 |
| 4.3.7.1 | Melt curve analysis | 110 |
| 4.3.7.2 | Agarose gel electrophoresis of Real time PCR products | 111 |
| 4.3.8 | Transcript analysis of beta-galactosidase | 111 |
| 4.3.9 | Cloning of beta-galactosidase in <i>E. coli</i> DH5 α | 113 |
| 4.3.10 | Cloning and expression of beta-galactosidase in <i>Z. mobilis</i> B-14023 | 114 |
| 4.3.11 | Cloning of beta-galactosidase in <i>E. coli</i> DH5 α and <i>E. coli</i> BL21 | 115 |
| 4.3.12 | Expression and Purification of beta-galactosidase | 117 |

| | | |
|-----------|--|-----|
| 4.3.13 | Effect of pH, temperature, and additives on beta-galactosidase activity | 117 |
| 5. | DISCUSSION | 119 |
| 5.1 | β -lactam resistance determinants of <i>Z. mobilis</i> and their homologues | 119 |
| 5.2 | Multiple β -lactam-resistance characteristic motifs in <i>Z. mobilis</i> | 121 |
| 5.3 | β -lactamases and PBPs in beta-lactam resistance in <i>Z. mobilis</i> | 121 |
| 5.4 | Antibiotic resistance in <i>Z. mobilis</i> is similar to that of non-pathogenic bacteria | 122 |
| 5.5 | Regulatory elements of beta-lactamases | 124 |
| 5.6 | Cellulose production has been reported in flocculating bacteria | 124 |
| 5.7 | Structural genes of Cellulose synthase operon in <i>Z. mobilis</i> | 125 |
| 5.8 | The cellulose synthase regulator protein has a transmembrane domain | 126 |
| 5.9 | ZMO0904 codes for a beta-galactosidase | 126 |
| 6. | SUMMARY | 128 |
