

CONTENTS

	<u>Page</u>
<u>CHAPTER I</u>	
Section A : Introduction and Review of previous work	1 - 9
Section B : Poly-functional Exchangers	10 - 13
Section C : Thermodynamic Quantities, theoretical models and formulations in ion-exchange equilibria.	14 - 29
Section D : Polarography of insoluble substances.	30 -33
 <u>CHAPTER II</u>	
Scope and object of the present work.	34 -38
 <u>CHAPTER III</u>	
Experimental	39 -51
 <u>CHAPTER IV</u>	
Exchange Capacity	52 -59
 <u>CHAPTER V</u>	
Interactions of chloride and perchlorate of thallium (I) with hydrogen-bentonite and effect of temperature in sorption-desorption and evaluation of thermodynamic quantities.	60 -91
Section A: (i) Sorption : $TlClO_4$ -H-bentonite system.	61 -74
(ii) Sorption: H-bentonite- $TlCl$ system.	74 -81
Section B: Desorption of Tl from Tl -H-bentonite system.	82 -91

CHAPTER VI

	Interaction of chloride and perchlorate of thallium (I) with silica gel: evaluation of thermodynamic quantities.	92 - 108
Section A:	Sorption: Silica-gel- PbClO_4 system.	93 - 101
Section B:	Sorption: Silica gel- PbCl system.	102 - 108

CHAPTER VII

	Interaction of the chloride and perchlorate of thallium (I) with aluminium hydroxide; evaluation of thermodynamic quantities, and potentiometric titrations.	109 - 126
Section A:	Sorption : Aluminium hydroxide - PbClO_4 system.	110 - 117
Section B:	Sorption : Aluminium hydroxide - PbCl system.	118 - 122
Section C:	Potentiometric titrations of hydrated alumina with bases.	125 - 126

CHAPTER VIII

	Application of polarographic technique in the study of suspensions of inorganic ion-exchangers	127 - 150
Section A:	Electro-Capillary curves	128 - 130
Section B:	Current-Voltage curves	151 - 140

	<u>Page</u>
Section C: Polarographic Maxima	141 - 144
Section D: Determination of the rate of attainment of desorption equilibrium.	145 -148
Section E: Effect of ageing of exchangers impregnated with electro-active ions in suspension.	149 -150

CHAPTER IX

Summary and Conclusion	151 -158
Bibliography	(1 - xv)
