ACKNOWLEDGEMENTS

Formostly I dedicate my entire work with the feelings of indebtedness to “The Almighty Lord” for providing me the strength and capacity to do hard work to make my dream come true. It is a great privilege for me to express a deep sense of gratitude and extreme thankfulness to the Lord for whatever I am today.

It gives me immense pleasure to express my deep sense of gratitude and most sincere thanks to my revered and esteemed supervisor Prof. Santosh Kumari for her constant inspiration, ever available guidance, valuable suggestions, constructive criticism and sustained involvement throughout the execution of the present work. Her affectionate nature and encouragement have left everlasting regards for her in my mind.

I owe special gratitude towards Prof. R.C. Gupta (Former Head) for his wise and invaluable guidance, pains taking efforts, kind suggestions, time to time help and constant inspiration just like co-supervisor that polished my raw abilities and enabled me to undertake this academic pursuit.

I am extremely thankful to Prof. N.S. Atri, Head, Department of Botany, Punjabi University, Patiala for his suggestions and providing me necessary laboratory facilities to complete this venture. I also acknowledge with great sense the indebtedness for the helpful attitude, valuable suggestions and kind cooperation throughout the present study to all the faculty members of the Department of Botany, Punjabi University, Patiala.

I am grateful to my friends for providing persistent support and critical advices throughout the course of my study. My vocabulary falls short of adequate words to express the gratitude towards Mr. Syed Mudassir Jeelani and Mr. Sanjeev Kumar, who helped me in every possible way and made me able to complete my thesis work in a satisfactorily manner. I extend my special thanks to Miss Kuljit Kaur, Miss Harpreet Kaur and Mr. Nadeem Mubarik for their constant encouragement and exhortation to put in my best during the ups and downs of present investigation, which kept my spirits up. I express my sincere thanks to Miss. Sandeep Kaur, who helped me every time whenever I was in need.

Intellect and soul both fail me while expressing sentiments towards my parents. Its them, in whom I have seen the reflection of God and without their care and interest in my studies, this dissertation would have never been completed. The moral encouragement provided by my younger sister Amita, is greatly acknowledged.

I also express my thanks to the non-teaching staff members of Department of Botany, for their cooperation during the course of work.

Finally, I offer my regards to all those who supported me in any respect during the completion of this dissertation.
