Preface 	1 - xii
Notations 	xiii - xiv

CHAPTER I

Nonlinear free vibrations of heated Plates
and Shallow Shells by von-Karman method .. 1 - 48

Abstract, Governing field equations,
Method of Solution for a Circular
Plate, Clamped edges, non-dimensional
time-periods, buckling criterion and
critical buckling temperature,
numerical results and discussion,
orthotropic circular plates, method
of solution for clamped movable and
immovable edges, results for simply-
supported plates, numerical results,
tables and discussion, critical
buckling temperature, transformation
of governing equations into complex
co-ordinates, conformal mapping
technique, method of solution for
regular polygonal plates, method of
solution for a shallow spherical
shell, non-dimensional time-periods
and membrane stresses.

CHAPTER II

Nonlinear free vibrations of elastic plates
at elevated temperature by Berger's method.. 49 - 62

Basic governing equations, solutions
for right-angled isosceles triangular
plates, trilinear co-ordinates and
equilateral triangular plates,
Parabolic Plates. Numerical
results.

CHAPTER III

Nonlinear free vibrations and thermal buckling of elastic plates and shells by a simplified approach	63 - 81
--	-----	-----	---------

Modified energy expression, derivation
of governing equations, method of
solution for a circular plate under
thermal loading, movable and immovable
edges, spherical shell subjected to a
thermal gradient. Numerical results
and discussion.
