ACKNOWLEDGEMENTS

An education is not how much you have committed to memory, or even how much you know. It is being able to differentiate between what you do know and what you don’t”.

Any achievement big or small should have a catalyst and a constant encouragement and advice of valuable and noble minds for our efforts to bring out this project.

An individual is a product of the lives of people that touch her. In my academic career I have had the encouragement of many people and it is my proud privilege to express my gratitude to them for their precious and scholastic contribution enhancement of my knowledge and in completion of this research work. The satisfaction that accompanies the successful culmination of any task would be incomplete without mentioning those who made it possible because success is the Epitome of Hard Work, Determination, Dedication, and Concentration. Several people have made this project a joy of work and it is my honor to have been associated with them.

It is very difficult to name all sources of inspiration to that enlightened and made easy the dark, difficult and narrow path known as research and experimentation. First and foremost, I offer my deep seeded adoration to “God Almighty” as this modest piece of work has been made possible by immense grace.

I am unable to find words, which could encompass the thankfulness that I feel for my guide. It gives me pleasure in expressing my profound regard and deep sense of gratitude to my esteemed supervisor Dr. Suman pant, Professor, Department of Home Science, Banasthali University. I am grateful to her for being constructive during this work. She spared her valuable time very often for discussion, to read through and offer comment despite of her numerous intellectual preoccupations. Her innate grace, a deep sense of devotion and concern has been and shall always remain a source of inspiration. She never let me down when I was facing problems but always had been by side to support me, showed me the path to come out of puzzling problems. Her indulgent patting showed me the fruits of diligence, indeed her maximum help, gentle discussion and prompt solution
of intricate problems which I faced have made it possible to complete this work within time.

It is my pleasant duty to record my abiding thanks to my co-supervisor Dr. D.B. Shakyawar, Director, UPTTI, Kanpur for his expert advice, invaluable suggestion, incessant encouragement, guidance, time, cooperation and inspiration throughout the project and for having given us the required permission to do this project and shared his precious time for discussion, amidst his busy engagement, for having provided us to get the required data for this project. His immense knowledge, constructive and illuminating suggestions, patience, sustained interest; inspiration and never say die attitude during the entire period of the study have brought this manuscript to its present form. His whole hearted help, encouragement and enlightening instructions will remain ever green in my heart for years to come. His indigence showed me the fruit of diligence.

My special thanks to all the faculty members of Home Science Department, Banasthali University and Avikanagar for their constant support and encouragement throughout this work.

I have immense pleasure in expressing my deep sense of gratitude and my sincere thanks to our Dean Dr. Indu Bansal.

I am deeply grateful to Mr. Amit, who helped me in knitting the fabrics for research work and providing necessary help and Ms. Gargi Tyagi for helped me in solving statistics.

I pay my deep respect and gratitude to Professor Aditya Shastri, (Vice chancellor, Banasthali University) and Professor Chitra Purohit (President, Banasthali University) for permitting me to undertake this study.

I owe my deepest gratitude to my lovely grandparents, parents and divine family who deserve special mention for their unconditional encouragement, support, prayers and took pain to shape my intellect especially my divine father and father in law, Shri. Arun Kumar Sharma and Shri. Mahesh Chandra Gupta, my charming mother and mother in law, Smt. Anoop Sharma and Smt. Anupam Gupta, who took pain to shape my intellect. I am thankful to them for providing the best facilities to me and making me
what I am today. I will be indebted lifelong for their academic pursuits. I am really grateful to God for giving me such loving and caring family.

What one achieves becomes insignificant if one cannot share it with someone special ones. Words fail me in my expressing my appreciation for my dear and lovely husband Mr. Mohit Agrawal for his dedication, love, selfless help, patience, sacrifice, constant encouragement, inspiration and cheerful company throughout the research work.

I would like to express my heartfelt strength to my sister, sister in law, brother and brother in law, Anjali, Varsha di, Honey Bhabi, Tanu di, Anurag, Shekhar Jiju, Saurabh Bhaiya and Sandeep Jiju who were always supporting for my work and made me learn to overcome the problems of life. Their priceless, moral support and enormous efforts are very precious for me. I am also deeply grateful to my little loving angels of my family Pari, Khushi, Luv and Tripti whose lovely smile always inspired me to do work in a good mood.

“A language of friendship is not words but meaning”

I feel very lucky and sometimes out of the world that I got such loving and supportive best friends Anuj, Prashansa, Meenal, Sonal Di and Bishakha who were always available for helping me with their co-operation and encouragement throughout the course of my study. I would not have been able to reach heights of excellence of life without the support of all the friends and elders with their spirited co-operation and excellent company.

I feel very affectionate in thanking all the people who are linked with me and their names have not been mentioned, but they really helped me and showed me the right way to my destiny.

At last, I would like to say that I had completed this project with full dedication. Yet I feel profound to be excused for my mistakes and any shortcomings.
