LIST OF TABLES

Chapter 1

Table 1: Effect of NAA and BA on shoot formation from cotyledonary nodal segments of *V. radiata* on MS medium supplemented with different PGRs.

Table 2: Effect of growth regulators on root induction of *in vitro* developed shoots of *V. radiata* on half strength MS medium supplemented with different PGRs.

Chapter 2

Table 1: Effect of BA on induction of multiple shoots from leaf derived callus of *V. radiata*

Table 2: Effect of kinetin on induction of multiple shoots from leaf derived callus of *V. radiata*

Table 3: Effect of IBA on rhizogenesis from leaf explants of *V. radiata*

Table 4: Effect of IAA on rhizogenesis from leaf explants of *V. radiata*

Table 5: Effect of NAA on rhizogenesis from leaf explant of *V. radiata*

Chapter 3

Table 1: Effect of auxins and cytokinins on callus induction and growth of *V. radiata*

Table 2: Effect of NaCl pre-treatment on callus induction from leaf explants (MS + 2,4-D 1mg/l) of *V. radiata*

Table 3: Effect of PEG pre-treatment on callus induction from leaf explants (MS + 2,4-D 1mg/l) of *V. radiata*

Table 4: Development of somatic embryos from leaf derived callus of *V. radiata*

Chapter 4

Table 1: Protein content and catalase activity in callus of *V. radiata*

Table 2: Protein content and catalase activity in PEG pre-treated leaf callus of *V. radiata*
Table 3: Protein content and catalase activity in NaCl pre-treated leaf callus of *V. radiata*

Table 4: Protein content and catalase activity in cell suspension culture of leaf derived callus of *V. radiata*

**LIST OF FIGURES**

*Chapter 1*

Figure 1a: Effect of BA on shoot formation from cotyledonary node explants of *V. radiata*

Figure 1b: Effect of NAA and BA on shoot formation from cotyledonary node explants of *V. radiata*

Figure 2a: Effect of IAA on root induction of *in vitro* developed shoots of *V. radiata*

Figure 2b: Effect of IBA on root induction of *in vitro* developed shoots of *V. radiata*

*Chapter 2*

Figure 1: Effect of kinetin on induction of multiple shoots from leaf derived callus of *V. radiata*

Figure 2: Effect of BA on induction of multiple shoots from leaf derived callus of *V. radiata*

Figure 3: Effect of IBA on rhizogenesis from leaf derived explants of *V. radiata*

Figure 4: Effect of IAA on rhizogenesis from leaf derived explants of *V. radiata*

Figure 5: Effect of NAA on rhizogenesis from leaf derived explants of *V. radiata*

*Chapter 3*

Figure 1: Callus induction from leaf explants cultured in MS medium supplemented with different PGRs of *V. radiata*

Figure 2: Effect of NaCl pre-treatment in callus induction from leaf explant (MS+ 2,4-D 1 mg/l) of *V. radiata*

Figure 3: Effect of PEG pre-treatment on callus induction from leaf explants (MS+ 2, 4-D 1mg/l) of *V. radiata*

Figure 4: Development of somatic embryos from leaf callus of *V. radiata*
Chapter 4

Figure 1. Protein content and catalase activity profile in callus of *V. radiata*
Figure 2: Protein content and catalase activity in callus derived from PEG pre treated leaf explants of *V. radiata*
Figure 3: Protein content and catalase activity in callus derived from NaCl pre-treated leaf explants of *V. radiata*

LIST OF PLATES

Chapter 1

Plate1: Micropropagation of *V. radiata*

Chapter 2

Plate1: Development of shoots from leaf derived callus of *V. radiata*
Plate 2: Rhizogenesis from leaf derived callus of *V. radiata*

Chapter 3

Plate 1: Callus morphology of *V. radiata* cultures
Plate 2: Effect of NaCl pre-treatment on callus induction from leaf explants (MS + 2,4-D 1mg/l) of *V. radiata*
Plate 3: Callus derived from PEG pre-treated leaf explant of *V. radiata*
Plate 4: Development of somatic embryos from osmotic stress induced pro embryogenic callus of *V. radiata*
Plate 5: Microscopic observations (200x) of the different stages of somatic embryos from cell suspension cultures of *V. radiata*
