ACKNOWLEDGEMENT

It is my humble and sincere duty to express a deep sense of gratitude to Dr. M.S. Choudhary, under whose able and inspiring guidance only it was possible for me to complete the thesis. I take this opportunity of acknowledging my sincere feeling of respect for his valuable discussions and constant encouragement throughout the work.

It is also worth and not mere a formality to pen a word of honour to Dr. R.K. Saxena, Professor and formerly Head of the Department of Mathematics, Shivaji University, Kolhapur who gave me this excellent chance for starting the research work. I am very much thankful for his guidance and valuable help in the initial stage of my research work.

My heartiest thanks are to the University Grants Commission, New Delhi for awarding me a Junior Research Fellowship which enabled me to complete this work.

For departmental facilities I would like to thank Dr. L. Radhakrishna, Head of the Department of Mathematics, Shivaji University, Kolhapur.

In spite of his busy working schedule Shri A.G. Gosavi did the typing work very neatly and skillfully, especially the mathematical format. His excellent typing is equally worth to receive my thanks on this occasion.

Lastly I would always remain obliged to my parents and other family members who inspired me from time to time in my research work.
