ACKNOWLEDGEMENT
Before I put into the record, may debt of gratitudes to all those who directly and indirectly helped, encouraged and co-operated in progress and completion of this piece of work. I knee down to pay my homage to that departed soul Professor G.V. Joshi, Head of the Department of Botany, Shivaji University, Kolhapur who was not only my guide, 'the guru' but friend and philosopher. It was he who lit the candle of inspiration to pursue research in the mind of this, otherwise prodigal student of Botany. I have no words to express my gratitude to him for relentless brotherly love, affection that he showered over and encouragement that he gave. If he were alive, it would have been a most happier day to him too. Although he was untimely snatched away from us by nature, this was filled up by Dr. B.A. Hegde, Reader and Head, Department of Botany, Shivaji University, Kolhapur. He ably shouldered the responsibility of late Professor Joshi. His able guidance and help is beyond words of appreciation for which I am grateful to him.

With great pleasure I express my deep feelings of gratitude to Rayat Shikshana Sanstha and to Principal S.D. Patil, Secretary, Rayat Shikshana Sanstha for their kind encouragement and keen interest which facilitated speedy progress. I would be failing in my duty if I do not record here the encouragement extended by Dr. P.B. Chavan, former, Head of the Botany Department, Science College Satara. Probably I would not have been able to take the advantage of Teacher Fellowship but for his inspiration to pursue the research. It is my duty also to thank Principals M.A. Shaikh, B.R. Choudhari and A.B. Vagdum who allowed me to take study leave from time to time.

I am also grateful to Dr. U.K. Kulkarni, Ex-Professor and Head, Department of Botany, Shivaji University, Kolhapur for his kind encouragement during his tenure of headship.
I would also be failing in my duty if I do not express my deep sense of gratitude to Dr. T. V. Patil and Dr. G. R. Naik for their relentless and kind help in every respect with a sense of brotherhood. I must say here that I cannot renay my debt of gratitude to them.

I also gratefully acknowledge my indebtedness to Dr. P. G. Patwardhan and his colleagues of M.A.C.S. Laboratory, Pune for the help in identifying the lichen specimens, Dr. B. B. Chougule of University Department of Botany, Pune for identifying the algal phycobionts, Dr. B. A. Mulla of Institute of Science, Bombay for helping in procurement and suggesting the research facilities at Bombay, Dr. Notani, Head, Division of Agriculture and Biology, Dr. B. K. Gaur and Dr. K. Raghu of B. A. R. C. Bombay for availing the radioactive counting facilities on liquid scintillation counter and Dr. V. K. Tiwari (Polymer chemist) of I. I. T. Bombay for the help in mineral estimation on Atomic Absorption Spectrometer of R. S. I. C. Powai, Bombay.

I am also grateful to the U. G. C., New Delhi for awarding me Teacher Fellowship under the Faculty Improvement Scheme, and the authorities of Shivaji University, Kolhapur for affording me all the facilities for research and study during the fellowship.

My thanks are specially due to my colleagues in the Department of Botany, Science College, Satara for shouldering the teaching and academic responsibility as well as allowing me free time for the completion of the thesis even after my fellowship tenure.

My sincere thanks are also due to Mrs. Shailja Khanvilkar, Dr. Subhash Jagdale, Prof. P. B. Mirajkar, Shri M. R. Lugade, Shri S. V. L. Prasad, Shri S. R. Kuchekar, Shri P. N. Bhosale and teaching and non-teaching staff in the University Department of Botany who have extended their co-operation to me in one or other way.
I am grateful to Shri A.G. Gosavi for his neat and skilful typing, artist Shri M.R. Deshmukh for photography and Shri Ravan and Shri Jagtap for drawing the figures and labelling the autoradiograms, Mrs. Bhuingade of Bhaveshwari Enterprises for printing and Shri Shinde for nice binding. I recall here that during my stay over here in Kolhapur, Mrs. Vijaya Hegde and Mrs. Swati Patil have extended hospitality and homely treatment to me which will linger for ever. I shall always be in debt to them.

Last but not the least this work of mine owes a lot of gratitudes to the members of my family - my elder brother (Anna), for his constant inspiration, blessings and moral support; my wife Mrs. Shalini who at great personal sacrifice, has encouraged me to have that freedom from family worries, the responsibility of running of a household, which have enabled me to concentrate on my research work. I am most deeply grateful to them.

Kolhapur
