

## LIST OF TABLE

Figure No.	Title	Page No.
1	Major uses of the selected ethnomedicinal plants and their chemical constituents	39
2	Antibacterial activity of acetone, methanol, aqueous and petroleum ether extracts of <i>Anisomeles indica</i> medicinal plant against UTI pathogens	49
3	Antibacterial activity of acetone, methanol, aqueous and petroleum ether extracts of <i>Boswellia serrata</i> medicinal plant against UTI pathogens	50
4	Antibacterial activity of acetone, methanol, aqueous and petroleum ether extracts of <i>Chlorophytum borivilianum</i> medicinal plant against UTI pathogens	52
5	Antibacterial activity of acetone, methanol, aqueous and petroleum ether extracts of <i>Euphorbia hirta</i> medicinal plant against UTI pathogens	53
6	Antibacterial activity of acetone, methanol, aqueous and petroleum ether extracts of <i>Evolvulus alsinoides</i> medicinal plant against UTI pathogens	55
7	<i>In-silico</i> carcinogen predictions using Toxtree	70
8	Prediction of Activity Spectra for Substances by PASS	73
9	Target Information from TTD & PDB	74
10	Annealing and Genetic algorithm Parameters	75
11	Consensus score for molecular docking	82
12	Hydrogen bond interactions for selected ligand CID: 5281787	86
13	Passive Absorption (human intestinal)	87
14	Bioavailability	88
15	Aqueous solubility	
	a. Aqueous solubility in pure water	88
	b. Aqueous solubility in buffer	89
16	Distribution	

	<b>a.</b> Drug binding to plasma proteins (human)	89
	<b>b.</b> Volume of distribution (Vd)	90
<b>17</b>	Ionization	90
<b>18</b>	Absolv equations	91
<b>19</b>	Physicochemical properties	91
<b>20</b>	MRDD-Maximum Recommended Daily Dose	92
<b>21</b>	Metabolism	92
