

LIST OF FIGURES

Figure No.	Title	Page No.
1	Antibiogram results of UTI pathogens with Standard Hi-media antibiotics	44
2	Antibacterial activity of different extracts of medicinal plant from North Gujarat	45
3	Minimum Inhibitory Concentration (MIC) ($\mu\text{g}/\mu\text{l}$) of acetone, methanol, aqueous and petroleum ether extracts from <i>Anisomeles indica</i> medicinal plant from North Gujarat against UTI pathogens	60
4	Minimum Inhibitory Concentration (MIC) ($\mu\text{g}/\mu\text{l}$) of acetone, methanol, aqueous and petroleum ether extracts from <i>Boswellia serrata</i> medicinal plant from North Gujarat against UTI pathogens	61
5	Minimum Inhibitory Concentration (MIC) ($\mu\text{g}/\mu\text{l}$) of acetone, methanol, aqueous and petroleum ether extracts from <i>Chlorophytum borivilianum</i> medicinal plant from North Gujarat against UTI pathogens	62
6	Minimum Inhibitory Concentration (MIC) ($\mu\text{g}/\mu\text{l}$) of acetone, methanol, aqueous and petroleum ether extracts from <i>Euphorbia hirta</i> medicinal plant from North Gujarat against UTI pathogens	64
7	Minimum Inhibitory Concentration (MIC) ($\mu\text{g}/\mu\text{l}$) of acetone, methanol, aqueous and petroleum ether extracts from <i>Evolvulus alsinoides</i> medicinal plant from North Gujarat against UTI pathogens	65
8	Ligand library of selected medicinal plant	66
9	Lipinski's Rule of Five	67
10	Toxicity and Mutagenicity Prediction	68
11	<i>In-silico</i> toxicity prediction using DRAGON	69
12	Bioactivity of drug like compounds	72

13	Mitogen-activated protein kinase (3ORN)	76
14	Thymidine monophosphate kinase (1G3U)	76
15	HIV protease (1AID)	77
16	Enoyl-ACP reductase (1NHG)	78
17	Dihydropteroate synthetase (1AD4)	78
18	Dihydropteroate synthetase (1TX2)	79
19	3-beta-hydroxysteroid dehydrogenase (3CH6)	80
20	Cytochrome P450 3A4 (3NXU)	80
21	Hydrogen interaction of HIV protease (1AID)	83
22	Hydrogen interaction of 3-beta-hydroxysteroid dehydrogenase (3CH6)	83
23	Hydrogen interaction of Cytochrome P450 3A4 (3NXU)	83
24	Hydrogen interaction of Enoyl-ACP reductase (1NHG)	84
25	Hydrogen interaction of Dihydropteroate synthetase (1TX2)	84
26	Hydrogen interaction of Mitogen-activated protein kinase (3ORN)	84
27	Hydrogen interaction of Dihydropteroate synthetase (1AD4)	84
28	Hydrogen interaction of Thymidine monophosphate kinase (1G3U)	85
29	Aqueous Solubility at given pH	89
30	Ionization at given pH	90
