

# CONTENTS

CHAPTER	TITLE	PAGE No.
<b>1. INTRODUCTION</b>		<b>1-9</b>
<b>1.1. Types of molecular markers</b>		<b>1</b>
1.1.1 Restriction Fragment Length Polymorphisms (RFLPs)		1
1.1.2 Randomly amplified polymorphic DNA (RAPD)		1
1.1.3 Amplified fragment length polymorphism (AFLP)		2
1.1.4 Minisatellite (VNTRs)		2
1.1.5 Microsatellite		3
1.1.6 Single nucleotide polymorphisms(SNPs)		4
<b>1.2. Microsatellite</b>		<b>4</b>
<b>1.3. Domestic Goat (“A poor man’s cow”)</b>		<b>6</b>
<b>1.4. The aim of this study</b>		<b>8</b>
<b>2. REVIEW OF LITERATURE</b>		<b>10-62</b>
<b>2.1. Molecular Markers for Genetic Polymorphism</b>		<b>10</b>
2.1.1. Polymorphism detection at protein level		10
2.1.2. Polymorphism detection at DNA level		11
2.1.2.1. RAPD markers		12
2.1.2.2. AFLP markers		13
2.1.2.3. RFLP markers		13
2.1.2.4. STS markers		13
2.1.2.5. EST markers		14
2.1.2.6. Microsatellite markers		14
2.1.2.7. SNP markers		15
<b>2.2. Microsatellites</b>		<b>16</b>

2.2.1. General characteristics of microsatellites	18
2.2.2. Microsatellite evolution	18
2.2.3. Theoretical models of microsatellite mutations	21
2.2.3.1. Mutation rate	23
2.2.3.2. Distribution of mutation size	23
2.2.3.3. Assymetry of mutation distribution	24
2.2.3.4. Range constraints	25
2.2.3.5. Dependence of the mutation process on allele size	25
2.2.3.6. Effects of heterozygosity	25
2.2.4. Testing models of microsatellite evolution	26
2.2.5. Potential problems associated with microsatellites	28
2.2.5.1. Null Alleles	29
2.2.5.2. Slippage	29
2.2.5.3. Homoplasia	29
2.2.5.4. Linkage Disequilibrium	30
2.2.6. Applications of microsatellites	31
2.2.7. Microsatellites-Preferred DNA Markers	33
2.2.8. Goat Microsatellite Polymorphisms	34
<b>2.3. SNPs versus Microsatellites: Allele Calling and Quality of Data</b>	<b>49</b>
2.3.1 Technical considerations	49
2.3.2 Statistical considerations	50
<b>2.4. Domestic Goat (<i>Capra hircus</i>) (“A poor man’s cow”)</b>	<b>52</b>
2.4.1. History, evolution and classification of <u>Caprine</u>	53
2.4.1.1. Order Artiodactyla	53
2.4.1.2. Suborder Ruminantia	53
2.4.1.3. Family Bovidae	53
2.4.1.4. Subfamily Caprinae	54
<b>3. MATERIALS AND METHOD</b>	<b>63-85</b>
<b>3.1. Selection of Gene Pool &amp; Collection of Blood Samples</b>	<b>63</b>

<b>3.2. Extraction of Genomic DNA from Blood Samples</b>	<b>63</b>
3.2.1. Principle	63
3.2.2. Procedure	64
3.2.3. DNA precipitation	65
3.2.4. Critical points in DNA isolation	65
<b>3.3. Qualities and Quantification of Genomic DNA</b>	<b>65</b>
3.3.1. Spectrophotometric measurement	66
3.3.1.1 Principle	66
3.3.1.2 Procedure of OD measurement	66
3.3.2. Ethidium bromide fluorescence measurement	67
3.3.2.1 Procedure	68
A. Weighing and boiling	68
B. Casting wicks	68
C. Casting the gel	68
D. Loading the gel	69
E. Starting the run	70
F. Detection/staining the gel	70
G. Disposal of ethidium bromide	70
H. Photography	71
I. DNA Quality Check	71
<b>3.4. Polymerase Chain Reaction (PCR)</b>	<b>75</b>
3.4.1. Principle	75
3.4.2. Typical cocktail for PCR	75
3.4.3. Mechanism of PCR	75
3.4.3.1. Denaturation at 94°C	76
3.4.3.2. Annealing at 52-65°C	76
3.4.3.3. Extension at 72°C	76
3.4.4. The touchdown PCR was utilized	76
3.4.5. Confirmation of amplified PCR product	76
<b>3.5. Polyacrylamide Gel Electrophoresis</b>	<b>77</b>
3.5.1. Principle	77

3.5.2. Denaturing Polyacrylamide Gel Electrophoresis (for microsatellite analysis)	78
3.5.2.1. Preparation of Glass Plates	78
A. Short glass plate preparation	78
B. IPC plate preparation	78
3.5.2.2. Assembling the Glass Plates Sandwich	78
3.5.2.3. Preparation of gel	79
3.5.2.4. Pouring the gel	79
3.5.2.5. Pre-run	79
3.5.2.6. Preparation and Loading of Sample	80
3.5.2.7 Running the gel	80
3.5.2.8. Silver Staining of the Sequencing Gel	81
3.5.2.9. Drying of gel	82
3.5.2.10. Manual scoring of silver stained PAGE gels for microsatellite alleles	82
<b>3.6. Microsatellite Data Analysis</b>	<b>83</b>
3.6.1. Allele Frequency / Gene Frequency	83
3.6.2. Effective Allele Number (Kimura and Crow, 1964)	83
3.6.3. Heterozygosity	83
3.6.4. Polymorphic Information content (PIC)	84
3.6.5. Software for microsatellite data analysis	84
<b>4. RESULT &amp; DISCUSSION</b>	<b>86-131</b>
<b>4.1. Result</b>	<b>86</b>
4.1.1. Molecular diversity analysis with in Jamunapari goat population	91
4.1.2. Molecular diversity analysis with in Malabari goat population	97
4.1.3. Molecular diversity analysis with in Osmanabadi goat population	102
4.1.4. Molecular diversity analysis with in Sangamneri goat	107

population	
4.1.5. Molecular diversity analysis between different goat populations (Genetic differentiation and genetic distance)	112
4.1.5.1 Principal component analysis	122
4.2 Discussion	125
5. SUMMARY	132
6. BIBLIOGRAPHY	I-XX
7. PUBLICATIONS	
APPENDIX I	I-VI
APPENDIX II	VII-VIII
APPENDIX III	IX
APPENDIX IV	X
APPENDIX V	XI
