

LIST OF TABLES

Table No.	Title	Page No.
2.1	The main categories of molecular markers.	16
2.2	Microsatellite polymorphism in <i>Capra hircus</i> reported across globe	45
3.1	Recommended Agarose Gel percentages for resolution of linear DNA	70
3.2	Microsatellite Markers, their sequences, type of repeat, location and accession numbers.	72
4.1	Natural breeding tract of Jamunapari, Malabari, Osmanabadi and Sangamneri	86
4.2	Measures of genetic variation at studied microsatellite loci: Jamunapari goat	93
4.3	Wright's F-statistics analysis for microsatellite loci in Jamunapari goats	95
4.4	Mutation-drift-equilibrium, heterozygosity excess/deficiency under different mutation models in Jamunapari goat population	96
4.5	Measures of genetic variation at studied microsatellite loci: Malabari goat	99
4.6	Wright's F-statistics analysis for microsatellite loci in Malabari goats	100
4.7	Mutation-drift-equilibrium, heterozygosity excess/deficiency under different mutation models in Malabari goat population	101
4.8	Measures of genetic variation at studied microsatellite loci: Osmanabadi goat	104
4.9	Wright's F-statistics analysis for microsatellite loci in Osmanabadi goats	105
4.10	Mutation-drift-equilibrium, heterozygosity excess/deficiency under different mutation models in Osmanabadi goat population	106
4.11	Measures of genetic variation at studied microsatellite loci: Sangamneri goat	109
4.12	Wright's F-statistics analysis for microsatellite loci in Sangamneri goats	110
4.13	Mutation-drift-equilibrium, heterozygosity excess/deficiency under different mutation models in Sangamneri goat population	111
4.14	Measures of genetic variation at studied microsatellite loci: Four breeds comparative of four breeds	115
4.15	Wright's F-statistics analysis for 20 microsatellite loci in Jamunapari, Malabari, Osmanabadi and Sangamneri goat breeds.	116
4.16	Private allele distribution in four breeds comparative	117
4.17	Estimation of pairwise F_{ST} values in four goat populations	118
4.18	Measures of over all of basic molecular diversity indices.	118
4.19	Analysis of Molecular Variance	119
4.20	Genetic Distance Estimations	121
