ACKNOWLEDGEMENTS

I would like to express my sincerest gratitude to my supervisor, Professor S V Pradhan for his phenomenal patience in guiding me and above all, teaching me how to think. His critical insights were invaluable for my research. I would also like to thank Mr Ramaiah, Librarian, Ramesh Mohan Library, CIEFL, for his courteous and ready help at all times, including the trouble he took to acquire a rare copy of Frazer for my use. Mr Rengamurthy was kind enough to type the early drafts of my thesis.

To my family—my parents and sister—I owe a debt a gratitude I cannot adequately express here. And last but not the least to the friends who made it all possible—Judith, Francis, Mr Srikanth, Anu and Anirvan Basu and Anuradha Rao—special thanks for bailing me out of my computer-related crises. To Meena for sharing with me the joys and travails of research. And to Kartik, gentle critic and friend, for teaching to swim and not sink in the world of computers.

Indumati Ramanathan
