List of Figures

Figure 1.1. Mean monthly rainfall (± S. D.) of Pondicherry region from 1987-2006.

Figure 1.2. Map study sites in and around Pondicherry

Fig. 5.1.1 Flowering and fruiting phenology of the study species

Figure 5.1.2. Relationship between Index of Self-incompatibility (independent variable) and Pollinator importance index (PI) (dependent variable)

Figure 5.2.1.1. Relationship between log abundance and fruit set by open pollination in all plant species

Figure 5.2.1.2. Relationship between log abundance and ISI ratio.

Figure 5.2.1.3. Relationship between log abundance and pollinator limitation in all plant species

Figure 5.2.2.1: Variation in fruit size (a) and fruit and seed weights (b) in *Ixora pavetta*

Figure 5.2.2.2: Variation in fruit size (a) and fruit and seed weights (b) in *Lepisanthes tetraphylla*

Figure 5.2.2.3: Variation in fruit size (a) and fruit and seed weights (b) in *Memecylon umbellatum*

Figure 5.2.2.4: Variation in fruit size (a) and fruit and seed weights (b) in *Tarenna asiatica*

Figure 5.2.2.5: Variation in fruit size (a) and fruit and seed weights (b) in *Walsura trifolia*

Figure 5.2.3.1. Relationship between mean distance between plants (log) and natural fruit set (arcsin)

Figure 5.4.1. Relationship between adult density (1ha) and sapling density (0.1) in natural and restored sites.

Figure 5.4.2. Dendrogram showing percentage visitation similarity between sites (Jaccard’s index/ unweighted)
Figure 5.4.3. Dendrogram showing percentage visitation similarity between sites (Sorensen's index/weighted).

Figure 6.1. Hypothetical effects of fragmentation and isolation on plant reproduction through loss of pollinators in TDEF.
