

## LIST OF FIGURES

<b>Figure No.</b>	<b>Title</b>	<b>Page No.</b>
4.1	Diameter of fibres	67
4.2	Length of fibres	69
4.3	Histogram of length of merino fibres	70
4.4	Histogram of length of soyabean fibres	70
4.5	Strength of fibres	71
4.6	Crimp of Fibres	73
4.7	Moisture Regain of Fibers	74
4.8	Twist of pure and blended yarns	76
4.9	Effect of Blend Ratio on Yarns Count	78
4.10	Strength of pure and blended yarns	80
4.11	Unevenness percentage of pure and blended yarns	82
4.12	Effect of blend ratio on fabric count of woven fabrics	84
4.13	Effect of blend ratio on fabric count of knitted fabrics	85
4.14	Effect of blend ratio and construction parameter on weight of woven and knitted fabrics	86
4.15	Effect on blend ratio and construction parameter of thickness of woven and knitted fabrics	88
4.16	Effect of blend ratio on cover factor of woven fabrics	90
4.17	Effect of blend ratio on tightness factor of knitted fabric	91
4.18	Effect of blend ratio on stitch length of knitted fabrics	93
4.19	Effect of blend ratio on tearing strength of woven fabrics	94
4.20	Effect of blend ratio and construction parameter on tearing strength of knitted fabrics	95
4.21	Effect on blend ratio on bursting strength of the knitted fabrics	97

<b>Figure No.</b>	<b>Title</b>	<b>Page No.</b>
4.22	Effect of blend ratio and construction parameter on abrasion resistance of woven and knitted fabrics	99
4.23	Effect of blend ratio and construction parameter on pilling grade of woven and knitted fabrics	101
4.24	Effect of blend ratio and construction parameter on air-permeability of woven and knitted fabrics	103
4.25	Effect of blend ratio and construction parameter on thermal insulation of woven and knitted fabrics	105
4.26	Effect of blend ratio and construction parameter on moisture absorption of woven and knitted fabrics	107
4.27	Effect of blend ratio on bending length of woven fabrics	109
4.28	Effect of blend ratio on bending length of knitted fabrics	110
4.29	Effect of blend ratio and construction parameter on percent drape coefficient of the woven and knitted fabrics	112
4.30	Effect of blend ratio and construction parameter on hand of woven and knitted fabrics	114
4.31	Effect of blend ratio on crease recovery of woven fabrics	116
4.32	Effect on blend ratio on crease recovery of knitted fabrics	116
4.33	Percent dye exhaustion	130
4.34	Percent dye exhaustion of vegetable dye (madder)	131
4.35	Acceptability of developed prototypes	138
