Acknowledgements

At first I thank God, as this thesis has seen the light of the day due to
the opportunity created by him, for me to work under the guidance of a skilled
Guru and Guide, Dr Shobha D Chitambar. With a deep sense of gratitude, I
wish to express my sincere thanks to my guide for helping me in planning and
executing the work in time. I acknowledge with earnest thanks the dedicated
supervision and constant monitoring of this research that enabled it to take
the right path. What I know today about the process of research is an
outcome of my association with her. Her overly enthusiasm and integral view
on research and her mission for providing only high-quality work and not less,
has made a deep impression on me. I consider myself extremely fortunate to
have carried out my research under her and would like to express my heart­
felt gratitude for her encouragement and personal involvement while writing
the thesis.

I am indebted to Dr A C Mishra, Director, National Institute of Virology,
Pune for giving me the opportunity to work for this degree and providing me
with the various facilities at the Institute. I express my sincere thanks to Dr V
Gopalkrishna for all his support. I am thankful to Dr Shobhana D. Kelkar for
making stored samples available for my research work. The co-operation
extended by Dr D. V. Barathe from Naidu Hospital, Pune and Dr A. N.
Boralkar from Shree Clinic, Pune for providing clinical specimens is gratefully
acknowledged.

I am thankful to Dr S. N. Singh for providing me library facilities.
Thanks are due to Mr Vishal Mali for his help in providing me different PDFs
required during the entire tenure. I gratefully acknowledge Mrs Lalita B.
Bhosale, Mrs Aruna P. Pardeshi and Mr Prabhakar S. Jadhav for extending
unconditional help in collection of clinical specimens from the local hospitals. I
am thankful to Mr Atul M Walimbe for his specialized help during analysis of
the data. I wish to thank Mrs Varsha Potdar, Mr Satish Ranawade and Ms
Shamal Tikhe for extending necessary help in nucleotide sequencing.
Laboratory assistance extended by Mr Suresh Ubale, Mr Rahul Jagtap, Mr
Acknowledgements

Manohar Shinde, Mr Ramesh Doiphode and late Mr Rajesh Kannalu is highly appreciated.

Special thanks are due to Mrs Sujata Ranshing, Dr Pratibha Ray and Dr Manika Buragohian for their valuable suggestions during my thesis writing. I am thankful to all my laboratory colleagues Dr Preeti Chhabra, Dr Ritu Arora, Dr Madhuri Joshi, Ms Komal Rawal, Ms Anis Lahon, Mrs Ruta Kulkarni, Mrs Laxmi Vandana Rongala and Mrs Pooja Patil for providing me a healthy working environment.

This research would not have been possible without the support of my husband Santosh, who stood by my side in times of dire need. The immense endurance and understanding shown by my daughter Sara during my entire Ph.D tenure is indeed praiseworthy. The understanding shown by my father-in-law and mother-in-law deserve a special vote of appreciation. I express my deep gratitude to my father for his blessings and support, to my grandmother, brother and sister-in-law for their love and care. And above all the blessings of my late mother were always felt.

Vaishali Tatte
