Student Research Committee

The composition of Sudha K Shrotria’s Student Research Committee was as follows:

- **Prof. S Sundar** (Convenor)
- Dr Leena Srivastava (Member)
- Dr Ligia Noronha (Member)
- Dr VVN Kishore (Member)
- Dr S K Sarkar (Member)
Acknowledgement

The effort to complete this research has been long and arduous and I feel a deep sense of gratitude to all who have helped me in this endeavour.

I am extremely grateful to my supervisors Prof S Sundar, TERI University and Dr Upendra Baxi, Professor Emeritus, University of Warwick for their valuable guidance and support.

Prof. Sundar inspired me through this long journey, and without his guidance, patience and support, this work would not have been possible.

Prof (Dr) Upendra Baxi, who kindly consented to be my co-supervisor, also motivated and guided me during my struggle. I am extremely grateful to him for his invaluable help and for having spared so much time, despite his many commitments. His guidance and advice has enriched me both personally and professionally.

I thank the SRC members, especially Dr Leena Srivastava (presently Acting Director General of TERI) and Dr Ligia Noronha for their valuable advice and comments during the SRC meetings.

I am greatly indebted to Dr Vishal Narain (of MDI) for his advice at the formulation stage of the research proposal and for sparing time to go through the first draft and giving many useful suggestions for improvement.

My sincere thanks to Gp. Capt. (Dr) Rajeev Seth (presently Acting Vice-Chancellor) for providing all support during this long journey. The members of the University's administration have been very helpful especially Mr Kamal Sharma and I take this opportunity to thank them all. A special word of thanks to Ms V B Suneetha, Prof. Sundar’s Secretary who was always pleasant and willing to help.

My sincere thanks to Justice A S Anand, erstwhile Chairperson of the National Human Rights Commission (NHRC) for sanctioning ‘study leave’ to me in order to pursue this research and also to his successor, Justice Rajendra Babu for sparing time to discuss the role of NHRC and for answering queries associated with the research. My sincere thanks to my senior colleagues Mr D K Biswas, Ex-Chairperson of CPCB (who unfortunately passed away before I could complete my work); Mr MMK Sardana, Ex-Secretary Government of India and Member of the
erstwhile MRTP Commission; Mrs S Jalaja, Ex Secretary, Government of India and presently Special Rapporteur of NHRC, for their valuable suggestions.

My sincere thanks to Mr AK Parashar, Deputy Registrar, NHRC and his staff Mr D P Singh and Ms Shilpi Baurai for extending me all the help in making available the documents, files and other records of NHRC relevant to my research. Every time I went to Mr Parashar’s office to collect information, not only was I greeted warmly by him and his team but they also willingly gave a hand in collating the information and accessing the NHRC records. My heartfelt thanks to Mr Sunil Arora, Assistant Registrar, NHRC who was always very prompt in giving me all the data I asked for.

My deep gratitude to all the respondents who sent replies to the questionnaires, who answered my calls, who spoke to me at length and without whose co-operation this research would not have been possible. My special thanks to Mr Ram Autar who met me during the field visit to Mahanser in Rajasthan, Mr Subramanya in Goa and Mr Azad in New Delhi.

My thanks to Mr Prasanna A. Acharya Chief Officer and Mr Viraj Arabekar, Sanitary Inspector of the Margao Municipal Council, Goa for sparing time to discuss the issues relating to waste treatment in Goa.

A special word of thanks to Mr V K Jain for assisting me with the field visit to Mahanser and my friends and colleagues, Ms Savita Rakhra, Dr Gopal Krishna Sarangi, Dr Prashant Kumar of TERI, Mrs Shobha George and Dr Savita Bhakary of NHRC, who have been a great source of encouragement and support.

Thanks are due also to my family for their support. My elder sister Dr Akhilesh Tewari who always has the deepest concern for me, my younger sister Dr Sunita Shrotria who kept inspiring me from London where she is based; my brothers abroad-Arvind Shrotria who lives in Ghana and Ravind Shrotria who lives in the US were constantly on the phone to motivate me and above all, my brother-in-law Mr Ajeya Shankar Tewari, who spent long hours copy-editing some of my work. My special thanks to him. I also thank my nephews Avneesh, Anmol, Shiva, Vishnu and Inesh who are computer wizards, for their help.

My late father, Brigadier R C Shrotria, MC who always encouraged and inspired me to take on challenges would have been very happy to see me complete this work. My deepest gratitude goes to my mother Mrs Dayawati Shrotria for bearing with me. She was crippled with arthritis and needed constant care. During the course of this research, she patiently tolerated my late working hours and the somewhat
limited attention I could give her. Unfortunately, she passed away well before I could complete this work. I miss her immensely and wish she had lived to see the completion of this study. To her I dedicate this work.
