ACKNOWLEDGEMENTS

No words are enough to express my gratitude and thankfulness to my esteemed, academic and revered guide Dr. V. C. Kalia; Scientist; Institute of Genomics and Integrative Biology; for taking me to explore the exciting field of biotechnology and introducing me to work in Microbial Biotechnology and Genomics laboratory. He has always been a pillar of strength and guidance, providing tremendous support and well-timed help, substantial encouragement and constructive criticism. He has been a great pillar of encouragement from time to time both formally and informally.

I sincerely want to express my regards for Prof. Dr. Samir K. Brahmacari; D. G., CSIR; former Director; Institute of Genomics and Integrative Biology and show my gratitude to Dr. K. C. Gupta; Acting Director; Institute of Genomics and Integrative Biology for providing me the opportunity and facilities for completing my Ph. D. work.

I register my deep sense of modest regards and thankfulness to Dr. Rakesh Sharma; Scientist; Institute of Genomics and Integrative Biology; for his critical comments and valuable suggestions and for teaching and helping me in all that I know about the Metagenomics of microbial world and allowing me to use his lab facilities.

I am also grateful to Dr. Yoginder Singh; Scientist; Institute of Genomics and Integrative Biology; for his critical comments and valuable suggestions. He is highly experienced and one of the finest personalities I have ever met. I am grateful to Dr. C. R. Kast for his valuable suggestions.

I wish to thank Dr. Hemant J. Purohit; Scientist and Dr. Mrs. Atiya Kapley; Scientist, National Environmental Engineering Research Institute (NEERI), CSIR, Nagpur; for allowing me to interact with them and providing important suggestions and discussions. They have freely allowed me to utilize all their resources of laboratory at NEERI, Nagpur, for different experiments which I carried out there. They have always provided me with sound advice for all my queries and motivated me to achieve the best for my future career.

I am highly obliged and grateful acknowledge the invaluable help and cooperation by Dr. Rupika Chattervedi; Scientist, Head PME division; Institute of Genomics and Integrative Biology, Delhi; during the course of my study.
I show appreciation to all my labmates, and colleagues, Mr. Raj, Mr. Ravi, and Mr. Narsingh, who at all times encouraged me to do the things again and again at the time of failures and making congenial atmosphere in the lab for working.

I would specially like to thank my friends Mr. Satyendra Singh, Mrs. Chetana, Ms. Ruchi and Mrs. Richa for being by my side unconditionally with immense love and support. They have always helped me in all aspects and staying with me through thick and thin. I consider myself fortunate to have such helpful and understanding friends. They were always there to hold me not to lose my zeal at the time of failures.

I would also like to thank my friends Mr. Praveen, Mr. Shet and Mrs. Meetu, who are my friends from the time of Masters at Panjab University, Chandigarh. They have always encouraged me and have always been supportive.

I take this opportunity to thank library staff and especially appreciate Mrs. Ganju and Mrs. Sheet for their efforts and willingness to help in providing literature well in time. I would like to thank the network administrators and staff members for the key role in providing us a stable, efficient and reliable network. Financial support by Council of Scientific and Industrial Research (CSIR) is duly acknowledged for my Ph.D. tenure, for various seminars, symposiums and for carrying out my work at NEERI, Nagpur.

A deep reverence and warm appreciation goes to my family for the encouragement and unconditional love at every footstep that they had given me. From them, I could learn to work hard at every step with ever pleasant and helpful nature at work place. It is all blessings of my parents that have made this achievement possible. I especially thank my sister, jiju and my brother for their constant encouragement and cooperation which has always been a source of inspiration.

Last but not the least I would like to thank to all those people unnamed for their moral support and those who helped me directly or indirectly in stepping me forward through the completion of my Ph. D. work.

Shalini Porwal
