Acknowledgements

No words are enough to express my gratitude and thankfulness to my esteemed, academic and revered guide Dr. D. T. Mourya; Deputy Director (Sr. Gr); National Institute of Virology, Indian Council of Medical Research, for taking me to explore the exciting field of molecular virology and introducing me to work in BSL-3 laboratory and handle highly infectious viruses, which is one of its own kind of specialization. He has always been a pillar of strength and guidance, providing tremendous support and well-timed help, substantial encouragement and constructive criticism. He has been a great pillar of encouragement from time to time both formally and informally.

I thank my parents especially my father for the encouragement at every footstep that they had given me. From them, I could learn to work hard at every step with ever pleasant and helpful nature at work place.

I show my gratitude to Dr. A. C. Mishra; Director; National Institute of Virology for providing me the opportunity and facilities for completing my Ph. D. work.

I register my deep sense of modest regards and thankfulness to Dr. V. S. Padbidri; former Officer in Charge, NIV, Pune for his critical comments and valuable suggestions. He is highly experienced and one of the finest personalities I have ever seen. I am also grateful to Dr. K. Banerjee; former Director, NIV; Pune, for his critical comments and suggestions. I am grateful to Dr. Mrs. J. P. Thakare for her valuable suggestions.

I would also like to thank Mr. Ramesh Jadi; Senior Research Officer, Microbial Containment Complex (NIV), for providing me invaluable guidance. I take this opportunity to appreciate his cheerful and ever helping attitude at work place. He has always lent his supporting hand, and his excellent guidance especially for tissue culture work and animal handling.

I would specially like to thank my friend Sandeep Kumar who has always helped me in all aspects and staying with me through thick and thin. I consider myself fortunate to have such a helpful and understanding friend. He was always there to hold me not to lose my zeal at the time of failures.

I will also like to extend my thanks to Dr. Pradic Barde, from whom I could learn various techniques of protein chemistry. I also show my gratitude to my colleague and a good friend Dr. Lt. Col. Raj Kumar, from whom I could learn various aspects of medical entomology and lot of things of official conduct.
I show appreciation to all my seniors, Dr. Dilip R. Patil, Dr. Miss Jyothi Bhat, and Dr. Pragya Yadav and colleague Miss Aruna Sivaram, who at all times encouraged me to do the things again and again at the time of failures and making congenial atmosphere in the lab for working.

I would like to thank Mrs. Veena C. Vipat for the best efforts she had put in, and for helping me out to learn and use sequencing machine for my phylogenetic analysis.

I acknowledge my special thanks to all the staff members of the Department including Dinesh K. Singh, Rajen Lakra, Uttam K. Shende, Sanjay V. Gopale, Madhav S. Achariya, Chandra P. Upadhyaya and Avind J. Jadhav, who helped me to their best at various times and made the environment so congenial to work at every step in one way or the other.

I would also like to thank Mr. Ganesh Chopade and Mr. Prashant Chabukswar for their timely support in various aspects.

I sincerely want to express my regards for Shri C. B. Lande and Shri K. A. Pillay from whom I could learn various things besides my Ph.D. work, such as raising and maintenance of mosquito colonies, mosquito inoculations and midgut dissection etc.

I would specially like to thank Dr. Mangesh D. Gokhale, Research Officer, for helping me to procure virus strains and mice for my initial work. His knowledge in geography and history besides science is worth mentioning that helped a lot from the small interactions and discussions with him.

I would also like to thank Dr. Anakkathil B. Sudeep, Research Officer and Mrs. Sulbha S. Athavale, Senior Technical Officer, for their timely help.

I would also like to thank my friend Manoj K. Tripathy at the National Centre for Cell Sciences, who is my friend from the time of Masters at Panjab University Chandigarh. He always encouraged me and helped me in collecting literature and information on general topics. He has always been supportive. Probably he is also the one from whom I have learned to be simple and hardworking, which paid off during the Ph.D. course work.

I would also like to thank my senior colleague Mr. Pradipt Tulmali for his cooperation and useful tips.

I take this opportunity to thank library staff and especially appreciate librarian Dr. S. N. Singh's effort and his willingness to help in providing literature well in time.
Last but not the least I would like to thank to all those people unnamed for their moral support and those who helped me directly or indirectly in stepping me forward through the completion of my Ph. D. work.

Rajeev Mehta
