

## LIST OF TABLES

TABLE NO	CAPTION	PAGE NO.
1.1	Composition of different parts of Winged bean	6
1.2	Mineral content in different parts of Winged bean	6
1.3	Vitamin content in different parts of Winged bean	7
1.4	Amino acid composition of different parts of Winged bean	8
1.5	Sugar contents in winged bean and soybean	8
1.6	Fatty acid composition of seeds of Winged bean, Peanut and soybean	9
3.1	Karyomorphological details in <i>P. tetragonolobus</i> (L.) DC.	101
3.2	Karyotypic parameters in <i>P. tetragonolobus</i> (L.) DC.	102
4.1	Accessions and their sources in Winged bean	113
4.2	Mean of the quantitative characters of some accessions in Winged bean	123
4.3	ANOVA of means for different characters of some accessions in Winged bean	124
4.4	Components of variances and heritability percentage in Winged bean	127
4.5	Estimation of genotypic (G) and phenotypic (P) correlations for eleven characters in Winged bean	131
4.6	Estimation of genotypic (G) and phenotypic (P) correlations for eight characters in Winged bean	132
4.7	Estimation of genotypic (G) and phenotypic (P) and correlations for five characters in Winged bean	133

TABLE NO	CAPTION	PAGE NO.
4.8	D <sup>2</sup> values arranged in ascending order for eleven characters in Winged bean	140
✓4.9	Distribution of sixty accessions of Winged bean in clusters	141
✓4.10	Average inter and intra cluster D <sup>2</sup> values in Winged bean	142
✓4.11	Average inter and intra cluster D values in Winged bean	143
✓4.12	Cluster means for eleven characters in Winged bean	146
✓5.1	Source and names/numbers of parental lines for 5 x 5 diallelic cross in Winged bean	184
✓5.2	Description of parental lines for 5 x 5 diallel cross in Winged bean	185
✓5.3	Source and number/names of parental lines for reciprocal crosses in Winged bean	186
✓5.4	Description of parental lines for reciprocal crosses in Winged bean	187
✓5.5	Description of parental lines for qualitative genetics/ inheritance	196
✓5.6	Mean performance of dwarf-scandent determinant monocarpic early line derived through pure line accession "SU-1-2-8 (F) of Winged bean	200
✓5.7	Mean of parents and hybrids for nine characters in 5 x 5 diallel cross in Winged bean	202
✓5.8	ANOVA of parents and their hybrids for nine characters in 5 x 5 diallel cross in Winged bean	203
✓5.9	Heterosis for nine characters in Winged bean	206
✓5.10	Analysis of combining ability for nine characters in 5 x 5, diallel cross in Winged bean	213
✓5.11	ANOVA of sixteen characters among lines in Winged bean (in reciprocal crosses)	214

TABLE NO	CAPTION	PAGE NO.
✓ 5.12	ANOVA of sixteen characters among lines and their F <sub>1</sub> hybrids in Winged bean (in reciprocal crosses)	215
✓ 5.13	ANOVA of sixteen characters among F <sub>1</sub> hybrids in Winged bean (in reciprocal crosses)	216
✓ 5.14	Mean values of sixteen characters of parents and their hybrids in reciprocal crosses in Winged bean	218
5.15	Inheritance of stem colour character in Winged bean	222
5.16	Inheritance of calyx colour characters in Winged bean	223
5.17	Inheritance of corolla colour characters in Winged bean	224
5.18	Inheritance of speck character in Winged bean	225
5.19	Inheritance of pod shape character in Winged bean	226
5.20	Inheritance of winged colour character in Winged bean	227
5.21	Inheritance of pod surface colour character in Winged bean	228
5.22	Inheritance of pod texture character in Winged bean	228
5.23	Inheritance of leaf shape character in Winged bean	229
5.24	Inheritance of seed coat colour character in Winged bean	230
5.25	Inheritance of hilum colour character in Winged bean	231
✓ 5.26	Estimates of general combining ability effects in 5 x 5 diallel cross in Winged bean	249
✓ 5.27	Estimates of specific combining ability effects in 5 x 5 diallel cross in Winged bean	252
✓ 5.28	Maternal and paternal effects in Winged bean	262

TABLE NO	CAPTION	PAGE NO.
✓ 6.1	Source and characters of accessions of Winged bean used for mutation breeding	285
✓ 6.2	Moisture percentage in seeds of Winged bean at gamma rays treatment	286
✓ 6.3	Effect of gamma rays irradiation on seed germination of Winged bean in laboratory condition	299
✓ 6.4	Effect of gamma irradiations on seed emergence/germination of Winged bean in field condition (on 15 <sup>th</sup> day after sowing)	302
6.5	Effect of gamma rays on seedling growth in Winged bean	304
✓ 6.6	Effect of gamma rays on mitotic index in Winged bean	318
✓ 6.7	Gamma rays induced mitotic abnormalities in Winged bean	320
✓ 6.8	Gamma rays induced morphological abnormalities in M <sub>1</sub> population of Winged bean	321
✓ 6.9	Mean performance of Winged bean mutants in M <sub>3</sub> generation derived from accession SU-1-2-8(F)	324
✓ 6.10	Mean performance of Winged bean mutants in M <sub>3</sub> generation derived from accession <u>SU-1-2-8(F)</u> by gamma rays irradiation ?	325
6.11	Mean performance of Winged bean mutants in M <sub>3</sub> generation derived from accession SU-8-81 by gamma rays irradiation	326
6.12	Mean performance of Winged bean mutants in M <sub>3</sub> generation derived from accession SU-19-sel.2 by gamma rays irradiation	327
✓ 6.13	Mean performance of Winged bean mutants in M <sub>3</sub> generation derived from accession SU-47-861	328

TABLE NO	CAPTION	PAGE NO.
✓ 6.14	Morphological characters in gamma rays induced male sterile plant of Winged bean	349
✓ 6.15	Rm values of peroxidase isozymes in male sterile plant of Winged bean	353
✓ 6.16	Similarity indices (55%) of peroxidase isozymes male sterile plant of Winged bean	353
✓ 6.17	Pollen sterility in gamma rays induced male sterile plant in Winged bean	355
