

TABLE OF CONTENTS

SYNOPSIS.....	10
Chapter 1.....	17
INTRODUCTION	17
1.1 Introduction.....	17
1.1.2 General Aspects of Septic Tank.....	18
1.2: Nutrient Induced Pollution.....	20
1.3: Current Scenario of Wastewater Management.....	25
1.4 Treatment Options for Nutrient Removal.....	26
1.4.1 Nitrogen Removal Methods.....	27
1.4.1.1 Air Stripping of Ammonia.....	27
1.4.1.2 Reverse Osmosis.....	27
1.4.1.3 Ion Exchange.....	28
1.4.1.4 Electrodialysis.....	28
1.4.1.5 Activated Sludge Process (ASP).....	29
1.4.1.6 Trickling Filter (TF).....	30
1.4.2 Phosphorus Removal Methods.....	30
1.4.2.1 Chemical Precipitation.....	31
1.4.2.2 Biological Removal.....	31
1.4.2.3 Hybrid Systems.....	32
1.5 Root Zone Technology (Constructed Wetland Treatment Systems).....	33
1.5.1 Free Water Surface (FWS).....	35
1.5.2 Horizontal Subsurface Flow (HSSF) Wetlands.....	35
1.5.3 Vertical Flow (VF) Wetlands.....	35
1.6 Mechanisms of Pollutant Removal in Constructed Wetlands.....	36
1.6.1 Physical Processes.....	36
1.6.2 Biological Processes.....	36
1.6.3 Chemical Processes.....	37
Chapter 2.....	38
LITERATURE SURVEY	38
2.1 Introduction.....	38
2.2 Review of Root Zone Treatment Systems (RZTS) in India.....	39
2.3 Review of Root Zone Treatment Systems (RZTS) in other Countries.....	41
2.4 Discussion.....	47
2.5 Scope and Objectives of the Proposed Study.....	50
2.5.1 Identification of Desirable Combination of Macrophyte and Medium....	51
2.5.2 Laboratory Scale Study of <i>Typha Latifolia</i> and Stone Grit Combination	51
2.5.3 Field Scale Study of <i>Typha Latifolia</i> and Stone Grit Combination.....	51
2.5.4 Kinetics of RZTS.....	52
2.5.5 Practical Application of Project Outcome.....	52
2.6 Organization of the Proposed Study.....	52
Chapter 3.....	54
EXPERIMENTAL METHODOLOGY AND RESULTS	54
3.1 Introduction.....	54
3.2 Material and Methods.....	54
3.2.1 Selection of Macrophytes.....	54
3.2.2: Selection of Bed Medium.....	55
3.2.3: Selection of RZTS Configuration.....	56
3.2.4 Analytical Procedures.....	56

3.3 Experimental Design	58
3.3.1 Laboratory Scale Setup for Identification of Desirable Combination of Macrophyte and Medium (Phase 1).....	58
3.3.2 Laboratory Scale Setup of <i>Typha</i> and Stone Grit Combination (Phase 2).....	59
3.3.3 Field Scale Setup of <i>Typha</i> and Stone Grit Combination (Phase 3).....	61
3.4 Results and Discussion.....	62
3.4.1 Evaluation of Selected Bed media for Nutrient Removal.....	62
3.4.2 Evaluation of Growth patterns of Selected Macrophytes	65
3.4.3 Evaluation of Macrophyte and Bed Medium Combination for Nutrient Removal (Phase 1)	68
3.4.4 Lab Scale Study with <i>Typha</i> and Stone Grit Combination (Phase 2).....	74
3.4.4.1 Nutrient Removal Mechanism (Initial Phase).....	74
3.4.4.2 Nitrogen Removal Mechanism (Established Phase).....	79
3.4.4.3 Phosphorus Removal Mechanism (Established Phase).....	82
3.4.4.4 Nitrogen Uptake of <i>Typha Latifolia</i>	83
3.4.4.5 Phosphorus Uptake of <i>Typha Latifolia</i>	85
3.4.5 Field Scale Study with <i>Typha</i> and Stone Grit Combination (Phase 3).....	87
3.4.5.1 Nitrogen Removal	87
3.4.5.2 Phosphorus Removal	96
Chapter 4	100
KINETICS AND DESIGN OF RZ TREATMENT SYSTEM.....	100
4.1 Introduction.....	100
4.2 Review of Kinetic Studies for Nutrient Removal in RZTS	101
4.3 Scope of Proposed Work.....	103
4.4 Lumped Parameter Model.....	104
4.4.1 Plug Flow First Order Kinetic Model.....	104
4.4.2 Complete Mix Kinetic Model	105
4.4.3 Plug Flow Reactor with Axial Dispersion and Reaction	105
4.5 Application of the Model, Results and Discussion.....	105
4.6 Distributed Parameter Model	109
4.6.1 Processes for Nitrogen Transformations	109
4.6.2 Model Development.....	112
4.7 Application of Models to Field Scale Studies	116
4.8 Typical Design of RZTS for Nutrient Removal	118
Chapter 5	121
CONCLUSIONS	121
5.1 Identification of Desirable Combination of Macrophyte and Media.....	121
5.2 Laboratory Scale Study of <i>Typha</i> and Stone Grit Combination	124
5.3 Field Scale Study of <i>Typha</i> and Stone Grit Combination	125
5.4 Kinetics of RZTS.....	127
Future Scope	128
List of Publications	129
Annexure I	130
Annexure II	133
Bibliography	137
