## CONTENTS

**LIST OF PUBLICATIONS OF THE AUTHOR** ........................................ xxiv

### 1. CHAPTER I: INTRODUCTION ................................................. 1

1.1. GENERAL INTRODUCTION .................................................. 2

1.1.1. Precipitation ........................................................... 7

1.1.2. Rain ................................................................. 8

1.1.3. Coalescence and Break up ........................................... 11

1.1.4. Monsoon ............................................................ 13

1.2. BACK GROUND ....................................................... 15

1.2.1. Rain Drop Size Distribution (DSD) .............................. 15

1.2.2. Rain Rate .......................................................... 26

1.2.3. Vertical profiles of rain DSD ...................................... 28

1.2.4. Altitudinal variation of rain DSD ................................. 35

1.2.5. Z-R Relation and its Vertical profiles ............................ 38

1.2.6. Comparison of TRMM precipitation data with other measurements .......................... 43

1.3. PRESENT STUDY .................................................... 46

### 2. CHAPTER II: EXPERIMENTAL TECHNIQUES, OBSERVATION STATIONS AND DATA AVAILABILITY .......... 48

2.1. INTRODUCTION ....................................................... 49

2.2. TECHNIQUES OF MEASUREMENTS .................................... 49

2.3. DISDROMETER ....................................................... 50

2.3.1. Principle of operation .............................................. 51

2.3.2. Block diagram/components of the Disdrometer ............... 53

2.3.3. Installation of the Disdrometer .................................. 54

2.3.4. Data collection .................................................... 56

2.3.5. Sample data ....................................................... 58

2.4. MICRO RAIN RADAR (MRR) .......................................... 59

2.4.1. Principle of operation .............................................. 60

2.4.2. Components of the instrument .................................. 65

2.4.3. Installation of the MRR ........................................... 67

2.4.4. Data collection .................................................... 69

2.4.5. Sample data ....................................................... 69

2.5. MANUAL RAIN GAUGE .................................................. 70

2.6. RAPID RESPONSE RAIN GAUGE (RRG) ............................. 71

2.7. TROPICAL RAINFALL MEASURING MISSION (TRMM) .......... 71

2.7.1. Components of the sensors and Principle of operation ....... 72

2.7.2. Data products: TRMM 3B42 algorithm for rain estimates ... 73

2.8. COMPARISON OF THE DATA FROM THE INSTRUMENTS ........ 74

2.8.1. Comparison between Disdrometer and Manual rain gauge .... 74

2.8.2. Comparison between Disdrometer and Rapid Response Rain gauge .................................. 76

2.8.3. Comparison between Disdrometer, MRR and TRMM data .... 80

2.8.4. Comparison of the DSD from Disdrometer and MRR .......... 81
LIST OF PUBLICATIONS OF THE AUTHOR

A. National and International peer reviewed Journals

5. Harikumar, R., Sampath, S., Sasi Kumar, V. Variation of Rain Drop Size Distribution with Rain Rate at a few Coastal and High altitude Stations in Southern Peninsular India. Atm. Res. 2008 (Under review)

B. National and International conference proceedings/presentations

5. Harikumar, R., Sampath, S., Mohan Kumar, G. Evidence of the Orographic Effect on Rain from Rain Drop Size Distribution at Coastal and High Altitude Stations. Proc. 18th Swadeshi Science Congress, Thiruvananthapuram, November-2008 (Selected for ‘Young Scientist-Best paper Award’).

**C. Scientific Report**

* Work not directly connected with the thesis.
