SYNOPSIS	“Studies towards the synthesis of simplextone A, eribulin mesylate and three component reactions in poly(ethylene glycol)”	I-XVI
CHAPTER-I	Synthetic efforts towards simplextone A	1-52
	Introduction to <i>Plakortis simplex</i>	1-8
	Natural products containing cyclopentane rings	9-22
	Present work	23-30
	Experimental section	31-49
	References	50-52
	Spectra	
CHAPTER-II	Synthetic efforts towards the C27-C35 segment of eribulin mesylate	53-104
	Introduction	53-63
	Previous approaches	64-68
	Present work	69-78
	Experimental section	79-100
	References	101-104

Spectra

CHAPTER-III A brief account on multicomponent reactions (MCRs) in

unconventional solvents	105-129
Introduction	105-106
Examples of MCRs	107-108
MCRs in water	109-112
MCRs in ionic liquids	113-118
MCRs in PEG	119-124
References	125-130

CHAPTER-IV

SECTION-A Copper catalyzed three component coupling reaction in

PEG-400 for the synthesis of 3-substituted indoles	131-164
Introduction	131-135
Preparation of 3-substituted indoles	136-139
Present work	140-149
Experimental section	150-159
References	160-164
Spectra	

SECTION-B Ruthenium catalyzed three component coupling reaction in

PEG-400 for the synthesis of 3-substituted indoles	165-201
Introduction	165-166
Multicomponent reactions for the synthesis of pyrrole	167-172

Present work	173-182
Experimental section	183-196
References	197-201
Spectra
