Acknowledgement

All praises and thanks to ‘Allah’, The most Beneficent, The most merciful, first and last, lord and cherisher of all the worlds who taught human kind every thing they knew not.

My first thanks go to my supervisor, Dr.Qazi Shoeb Ahmad, Associate professor, Department of Mathematics, Integral University, Lucknow, for his invaluable guidance and encouragement throughout the course of research. I must appreciate him for his great involvement and sympathetic behavior that compelled me to complete this work.

I owe a deep sense of gratitude to my Co-Supervisor, Prof. Abdul Bari, Department of Statistics and Operations Research, Aligarh Muslim University, Aligarh, who has inculcated in me the interest and inspiration to undertake the research in the field of Operations Research. It is only his personal influence, expert guidance and boundless support that enabled me to complete the work in the present form.

I am also thankful to Dr.Mubeen Ahmad, Head, Department of Mathematics, Integral University, Lucknow, and all the other faculty members of the Department of Mathematics, Integral University, Lucknow, and of the Department of statistics & Operations Research, A.M.U, Aligarh for their full cooperation and support during the work.

I would be failing my duties if I do not express my special appreciation to Mr. Irfan Ali for his willing sacrifices of time and energy, prompt response to inquires and stimulating discussions on many aspects of this thesis.

I place on record my special sense of gratitude to Dr.Ziaul Hasan Bakshi, Dr.Zaki Anwar and Yashpal Singh Raghav who have always been a source of
encouragement for me. They helped me a lot during my work. Apart from the subject of my research, I learnt a lot from them, which I am sure, will be useful in different stages of my life.

I would like to express my deep sense of indebtedness to my parents. My father Prof. Sanaullah Khan as well as my mother have been dreaming for quite a long time for my success. They have done every thing possible to see me at this place. My father has always helped me in good and bad times alike to keep me focused towards my goal. The completion of this thesis would have been rather impossible without his whole hearted support, encouragement and sacrifices during the tough and easier phase of this project. I am convinced that I could not have maintained interest in the research without being profoundly impressed by his inherent elegance. I feel shortage of words to pay thanks to him. I would also like to express my special thanks to my brothers, Haris, Yasir and my cousins Amjad, Sharique for their best wishes.

I am greatly obliged to all my friends and colleagues who encouraged me and helped in various ways throughout the development stages of this thesis.

Last but not the least, I wish to thank my wife, SUBUHI for her constant moral support, encouragement, and sacrifices of loneliness due to my busy schedules.
