# Table of Contents

## Preface

(i)

## Acknowledgements

(ii)

## Abbreviations

(iii)

## Introduction

1

## Review of Literature

6

### The Cell Cycle-Control Point for Cell Differentiation

6

### Polyamine Biosynthesis, Metabolism and Their Subcellular Compartmentation

9

### Molecular and Cellular Functions of Polyamines

11

- Use of Inhibitors to Study the Physiological Significance of Polyamines
  12
- Polyamines and Cell Cycle
  13
- Involvement of Polyamines in DNA, RNA and Protein Synthesis
  16
- Involvement of Polyamines in Plant Growth
  21
- Interaction of Polyamines with Growth Regulators
  23

### Effect of Polyamine Biosynthesis Inhibitors on Growth and Differentiation

25

## Interrelationship Between Polyamines and Ethylene

26

## Role of Ethylene in Growth and Differentiation

30

- Role of Factors Affecting Ethylene Production During Development
  31
  - (i) Hormones
  31
  - (ii) Light
  31
  - (iii) Ethylene and gene expression
  32
ENZYMES ASSOCIATED WITH GROWTH AND DIFFERENTIATION 33

Glyoxalase-I and Its Role in Cell Division 35

Threonine Deaminase and Its Relation to Morphogenesis 38

FUNCTIONAL ROLE OF MEMBRANE LIPIDS 39

TURNOVER OF INOSITOL PHOSPHOLIPIDS AND SIGNAL TRANSDUCTION 41

Involvement of Ca\(^{2+}\) ions in PI Cycle 43

Mitogen-Activated PI Metabolism 44

ROLE OF POLYPHOSPHOINOSITIDES IN PLANTS 45

ASSOCIATION OF PHOSPHOLIPIDS WITH POLYAMINES 48

PHYTOCHROME INVOLVEMENT IN MORPHOGENESIS 49

LIGHT-INDUCED CHANGES IN MEMBRANE LIPIDS 51

MATERIALS AND METHODS 54

PLANT MATERIAL AND GROWTH CONDITIONS 54

LIGHT TREATMENT 55

PREPARATION OF CBB REAGENT FOR PROTEIN ESTIMATION 55

Stock Solution 55

PREPARATION OF PLANT TISSUE CULTURE MEDIUM 56

INITIATION AND MAINTENANCE OF CALLUS AND SUSPENSION CULTURES 56

Cell Number 59

EXTRACTION AND ASSAY OF ENZYME GLYOXALASE-I 59

EXTRACTION OF THREONINE DEAMINASE 60

Ammonium Sulfate Purification 60

ASSAY OF THREONINE DEAMINASE 61
ANALYSIS OF GLYCEROPHOSPHOINOSITIDES

Incubation of Hypocotyls

$[^{32}P]$ Orthophosphate Incorporation

Lipid Deacylation

Anion-exchange Chromatography

ETHYLENE DETERMINATION

PROTEIN ESTIMATION

SOURCE OF CHEMICALS AND RADIOLABELLED COMPOUNDS

DATA PRESENTATION

RESULTS

INDUCTION OF CALLUSING AND DIFFERENTIATION OF BRASSICA CULTURES

Effect of Spermidine on Growth and Differentiation

Effect of MGBG on Cell Proliferation and Differentiation

Effect of Spd and MGBG on Cell Number in Suspension Cultures

Phytochrome Regulation of Differentiation in Brassica

Effect of MGBG on Phytochrome-Regulated Differentiation

ROLE OF CELL CYCLE INHIBITORS IN CONTROL OF DIFFERENTIATION

Effect of Various Inhibitors on Differentiation in Brassica

Role of Inhibitors in Induction of Differentiation in Nicotiana and Datura

INvolvement of Glyoxalase-I in Cell Proliferation and Differentiation
Age Kinetics of Glyoxalase-I in Brassica Seedlings
Correlation of Different Developmental Stages with Glyoxalase-I Activity
Effect of Inhibitors on Glyoxalase-I Activity in Brassica
Effect of Inhibitors on Glyoxalase-I Activity in Nicotiana and Datura
Effect of GSH on Cell Proliferation and Glyoxalase-I Activity
Glyoxalase-I Activity in Proliferating and Differentiating Cultures

IN Volvement of Threonine Deaminase in Cell Proliferation and Differentiation
Effect of Polyamines on the Activity of Threonine Deaminase in vitro and in vivo
Effect of Polyamines and MGBG on Threonine Deaminase in Brassica Cultures

Role of Ethylene in the Control of Differentiation in Brassica
Ethylene Levels in Proliferating and Differentiating Cultures
Effect of Polyamines on Ethylene Levels in Brassica Cultures
Effect of Amino Acids on Ethylene Levels in Brassica Cultures
Effect of Ethylene Precursors and Ethylene Inhibitors on Ethylene Level and Shoot Differentiation
Effect of Different Light Treatments on Ethylene Production in Brassica

Phosphatidylinositol Turnover in Regulation of Differentiation in Brassica
Glycerophosphoinositides in Proliferating and Differentiating Cultures 124

Effect of Polyamines on GPI in Cultures 128

Effect of Polyamines on GPI in Brassica Hypocotyls 130

Effect of Polyamines, SAM and MGBG on \(^{32}P\) Incorporation into GPI, GPIP and GPIP\(_2\) in Hypocotyls of Brassica 133

Effect of Amino Acids on Glycerophosphoinositides in Cultures 135

Effect of Amino Acids on Glycerophosphoinositides in Hypocotyls 136

Phytochrome Control of PI Turnover in Brassica 140

Escape from Photoreversibility of PI Turnover 145

DISCUSSION 148

CONTROL OF CELL DIVISION AND DIFFERENTIATION 149

Interaction of Polyamine with Hormones 149

Role of MGBG - an Inhibitor of Polyamine Biosynthesis 151

Role of Various Classes of Inhibitors 153

ROLE OF GLYOXALASE-I IN CELL PROLIFERATION AND DIFFERENTIATION IN BRASSICA 159

MODULATION OF THREONINE DEAMINASE BY POLYAMINES AND ITS CORRELATION WITH DIFFERENTIATION 160

ROLE OF ETHYLENE IN PROLIFERATION AND DIFFERENTIATION 162

Effect of polyamines 162

Effect of amino acids 163

Effect of ethylene precursors and inhibitors of ethylene biosynthesis 164
