future prospects
FUTURE PERSPECTIVES

- In vivo studies are needed to be carried out to establish the data.
- IVIVC should be carried out for establishing the product.
- Pilot plant scale up studies as per the cGMP guidelines of FDA, India are needed to establish product commercially.
- Such kind of approach can be explored for developing novel formulations of drugs of different category.
- More such multidrug formulations for different release characteristics can be developed for various diseases so as to have better disease management, patient compliance and reduced cost.
