

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
3.1	Sample details	35
3.2	Features of the spectro-radiometer used in this study	39
3.3	Area coverage by instrument with respect to height	41
4.1	Types of soils used for textural analysis	50
4.2	Characteristics of sand used in this study	51
4.3	Summary of the spectral parameter results for river sand	55
4.4	Summary of the results of analysis of spectral parameters for beach sand	63
4.5	Summary of the spectral parameter results for coloured beach sand	68
4.6	Summary of the spectral parameter results for red soil	70
4.7	Summary of the spectral parameter results for black soil	73
4.8	Summary of the relationship between texture and spectral parameters of different soil types	75
4.9	Types of soils used for water content analysis	78
4.10	Details of the water content in brown soils	79
4.11	Details of the water content in white soils	82
4.12	Details of the water content in red soils	84
4.13	Details of the water content in black soils	87

TABLE NO.	TITLE	PAGE NO.
4.14	Summary of the spectral parameter results for brown soils with different water content	92
4.15	Summary of the spectral parameter results for black soils with different water content	95
4.16	Summary of the spectral parameter results for red soils with different water content	98
4.17	Summary of the spectral parameter results for white soils with different water content	100
4.18	Summary of spectral parameter obtained	102
4.19	Characters of samples collected	104
4.20	List of absorption regions related to mineralogy of soils (Source: Jamshid and Abbas (2002))	112
4.21	Results of XRF analysis for different clay samples vary in colour	127
4.22	Results of XRF analysis for pure artificial clay samples	127
4.23	Results of XRF analysis for different clay samples	127
4.24	Results of XRF analysis for different soil samples	128
4.25	Results of XRF analysis for different sand samples	128
4.26	Characteristics of soil samples used in this study	131
4.27	Characteristics of the sand samples with clay used in this study	131
4.28	Spectral seperability of spectra of sand with different proportions of kaolin clay	137
4.29	Summary of the principal results related to the	151

TABLE NO.	TITLE	PAGE NO.
	spectral parameters	
4.30	Typical values of dry density of various soil	153
4.31	Liquid limit, plastic limit result for Guduvancherry samples	156
4.32	Degree of influence of index properties on the spectral parameters in the VNIR-SWIR region (Number of asterisk marks indicates degree of influence of each parameter)	161
