ACKNOWLEDGEMENTS

First and foremost I pay my tribute to the almighty ‘GOD’ with the flowers of my veneration and devotion, for Graceful Blessings at every step without which this humble expression of my effort would have not seen the light of the day.

It is also my privilege to express my profound sense of gratitude to the president of the Vidyapith Prof. Chitra Purohit, Vice-Chancellor of the University Prof. Aditya Shastri, for providing state-of-the-art facilities of research at this University and for developing this institution into a world class University by dint of his academic farsightedness.

My sincere thanks to the librarians of Banasthali University for providing me the facilities of the library at all times. Thanks are also due to the librarians of University of Delhi and IIT, Delhi for allowing me to collect relevant research material to complete this study.

Conducting research in a multidisciplinary area such as this is not an easy task. It required the support of so many people. Sentiments of my heart when molded into words can seldom convey what I truly wish to express to each of them. I begin with a humble expression of my profound gratitude to all my respected teachers, Prof. D. Kishore, Prof. Sudha Shastri, Dr. Jaya Dwivedi, Dr. Bhawani Singh, Dr. Dinesh Kumar, Shri Rajendra Kumar, Dr. Sudhanshu Sharma, Dr. Manish Shrivastava, Dr. Sudesh Kumar, Dr. Kavita Poonia, Dr. Sonika Jain, Ms. Parul Khuranan and Ms. Sheenam Thathai for their kindness and blessings which they bestowed upon me leading me through a long and thorny path to a dip into the ocean of knowledge. I am deeply grateful to all the other staff members of the Department of Chemistry, Banasthali University for their valuable support.

In exact sciences like chemistry, laboratory facilities are indispensable. I appreciate the help rendered to me by the non-teaching staff of the department by Shri K.L. Lunia, Shri VishnuSharma, Dr. Birbal Luniwal, Shri Vinod Sharma, Shri Rajesh Sharma and Shri Mool Singh for their generous help, goodwill and cooperation which they had extended in making the laboratory facility handy to me during the course of this work and to the lab attendants (Shri L. D. Swami, Shri Ramdhan, Shri Sunil, Shri Rajesh and Shri Mukesh) for providing their help in all phases of laboratory work.
My sincere thanks are due to my seniors Dr. Anshu Agarwal di, Priyanka Raghav Di and Er. Neeraj for the inspiration, encouragement and unforgettable support which they provided to me during this work.

No words would be befitting enough to express my deep sense of appreciation to my friends Ms. Anu Tyagi, Prachi Rathi, Ms. Priyanka Sharma, Ms. Navjeet Kaur, Ms. Pratima Sharma and Smt. Manju Rani for their support during this work. I find words inadequate to express my feelings of joy, for the affection and the encouragement which I received from my other seniors Shashi Shekhawat di, Pragati Sharma di, Priyanka Chaudhary di, Meenakshi Sharma di, Smt. Anupama Singh di, Pragati Yadav di and Vandana Singh di.

I convey my sincerest regards to my jiji Dr. Suman Shastri (hostel warden) for her care, love and affection and for providing a moral support during the course of this work.

None would ever thrive in life without the blessing of one’s parents and the elders in the family. I bow my head with great respect before my beloved Papa Shri Ramesh Kumar Pareek and Mummy Smt. Savitri Pareek, who have made me what I am today. They are always with me both in my dreams and actions. My noble hearted and compassionate parents laid the solid foundations of my educational career and always cherished to see me, reach to newer heights of excellence. Their life and teachings have taught me that excellence is continuous journey and has no destinations. I owe all this to their angelic grace. I hope they will be very happy to see that the dreams which they nurtured and developmental inputs which they provided have started taking the desired shape. In fact, I am short of words for their contributions in shaping my life as they are the real architects of my life.

Words would fail to express what I owe to Shri Rahul Pareek and Jigyasa (my elder brother and his wife) and Er. Abhishek Pareek and Yamini Pareek (my younger brother and his wife) for their affection, care, inspiration, sacrifice and constant encouragement to pursue higher studies.

“True friends are like diamonds precious but rare, false friends are like autumn leaves found everywhere”.
In an ecstasy of delight, I trap these finer moments of my life to record a deep sense of appreciation to my best friend Sarita (Sanju) for her unstinted support in the work. Her good wishes greatly helped me to carry out this research work with courage and determination. She has been a constant source of inspiration and motivations in all critical phases; especially when my morale ebbed and enthusiasm waned. She has really stood by me in all thick and thin. Without her loving support, this study would never have been completed.

I wish to take this opportunity to express my sincere regards to my respected Nanaji Shri. Vidhushekher Pareek and Naniji Smt. Shanti Pareek.

I appreciate my niece Anvi Pareek (my Golu beta) who always provided a very pleasant environment during my visits to them. This gave me lot of freshness and energy to pursue my research work more vigorously.

I take this opportunity to express my heartiest thanks to all the research scholars of chemistry for their co-operations and moral support in this work.

I am very much indebted to the Director, SAIF, (Sophisticated Analytical Instrumentation Facility) Punjab University, Chandigarh for providing the analytical and spectral data of the compounds.

At the threshold, remembering that an ungrateful cannot escape the hell, I would, in all my humility, like to put on record my deep sense of indebtedness to all those who have contributed directly or indirectly in transforming the idea into a reality in the form of this thesis.

Lastly, I nod my head before all my teachers for carving my sandy life with their indelible footprints.

Banasthali Vidyapith
(Aastha Pareek)
