

TABLE OF CONTENTS

SUBJECT	PAGE NO.
List of Tables	I-II
List of Figures	III-VII
Abbreviations	VIII-XI
Abstract	XII-XIV
1. Introduction and review of literature	1-49
1.1. Cancer Chemoprevention	3
1.2. History of natural cancer therapeutics	5
1.3. Current plant based therapies	9
1.3.1. Tubulin-binding agents	9
1.3.1.1. Microtubule destabilizing agents	9
1.3.1.1.1. Vinca alkaloids	9
1.3.1.1.2. Other microtubule destabilizing agents	12
1.3.1.2. Microtubule stabilizing agents	14
1.3.1.2.1. Taxanes	14
1.3.1.2.2. Other microtubule stabilizing agents	17
1.3.2. Topoisomerase inhibitor	20
1.3.2.1. Topoisomerase I inhibitors	20
1.3.2.1.1. Camptothecins	20
1.3.2.2. Topoisomerase II inhibitors	22
1.3.2.2.1. Podophyllotoxins	22
1.3.2.2.2. Anthracyclines	24
1.4. Other natural anticancer compounds	26

1.4.1.	From plant sources	26
1.4.2.	From microbial sources	29
1.4.3.	From marine sources	31
1.5.	Chemopreventive compounds from natural sources	35
1.5.1.	Tea polyphenols	35
1.5.2.	Curcumin	39
1.5.3.	Resveratrol	41
1.5.4.	Lycopene	44
1.5.5.	Genistein	46
1.5.6.	Quercetin	48
2. Research envisaged		50-54
3. Experimentation		55-90
3.1.	Collection and authentication of plant	55
3.1.1.	Extract preparation	55
3.1.2.	Phytochemical screening of <i>A. catechu</i> heartwood	55
3.1.2.1.	Qualitative phytochemical screening of <i>A. catechu</i>	55
3.1.2.2.	High performance liquid chromatography (HPLC) analysis	57
3.1.3.	Isolation of (+)-catechin	58
3.2.	Cell lines maintenances	58
3.2.1.	Trypan blue dye exclusion assay	59
3.2.2.	3-[4,5-dimethylthiazol-2-yl]-2,5-diphenyl-tetrazolium bromide (MTT) assay	60

3.2.3.	Sulforhodamine B (SRB)	60
3.2.4.	Lactate dehydrogenase (LDH) assay	61
3.2.5.	Morphological changes of cells	62
3.2.5.1.	Hoechst assay	62
3.2.5.2.	Acridine orange/ ethidium bromide (AO/EB) fluorescence staining	63
3.2.6.	Estimation of percentage (%) of DNA fragmentation	63
3.2.7.	Detection of DNA fragmentation by agarose gel electrophoresis	64
3.3.	Animal studies	64
3.3.1.	Experimental animals	64
3.3.1.1.	Breast cancer model	64
3.3.1.1.1.	Experimental design and tumor induction	64
3.3.1.1.2.	Tumor analysis	65
3.3.1.2.	Skin cancer model	65
3.3.1.2.1.	Experimental design and tumor induction	65
3.3.1.2.2.	Tumor analysis	66
3.3.1.3.	Liver cancer model	66
3.3.1.3.1.	Experimental design and tumor induction	66
3.3.2.	Biochemical Parameters	67
3.3.2.1.	Isolation of Serum	67
3.3.2.2.	Preparation of tissue homogenate	67

3.3.2.3. Tumor markers	68
3.3.2.3.1. Estimation of total sialic acid (TSA) levels	68
3.3.2.3.2. Measurement of lipid-associated sialic acid (LASA) levels	68
3.3.2.4. Liver injury markers	70
3.3.2.4.1. Estimation of aspartate aminotransferase/ Glutamic oxaloacetic transaminase (AST/ GOT)	70
3.3.2.4.2. Estimation of alaine aminotransferase/ Glutamic pyruvic transaminase (ALT/ GPT)	70
3.3.2.4.3. Estimation of alkaline phosphatase (ALP)	71
3.3.2.4.4. Estimation of gamma glutamyl transferase (GGT)	72
3.3.2.5. Oxidative Stress Related Parameters	72
3.3.2.5.1. Lipid peroxidation	72
3.3.2.5.2. Nitric Oxide Synthase	73
3.3.2.5.3. Superoxide dismutase	74
3.3.2.5.4. Catalase	75
3.3.2.5.5. Glutathione peroxidase	75
3.3.2.5.6. Glutathione reductase	76
3.3.2.5.7. Glutathione <i>S</i> -transferase	77
3.3.2.5.8. Total thiol	78

3.3.2.5.9. Reduced glutathione	78
3.3.2.5.10. Protein thiols	79
3.3.2.5.11. Estimation of Protein	79
3.3.3. mRNA expression studies	80
3.3.3.1. Total RNA isolation	80
3.3.3.2. Estimation of purity and concentration of RNA	81
3.3.3.3. Agarose Gel Electrophoresis of RNA	81
3.3.3.4. Reverse transcriptase polymerase chain reaction (RT-PCR)	82
3.3.3.4.1. Agarose gel electrophoresis for PCR products	85
3.3.4. Protein quantification	86
3.3.4.1. Nuclear extract preparation	86
3.3.4.2. Protein quantification by ELISA	87
3.3.5. Histopathology	87
3.3.6. Immunohistochemical localization studies	89
3.3.7. Statistical analysis	90
4. Results and observations	91-191
4.1. Cytotoxicity testing of different extracts of <i>Acacia catechu</i> Heartwood	91
4.1.1. <i>In-vitro</i> proliferation studies	91
4.1.2. Effect of AQCE on human peripheral lymphocytes	96
4.1.3. Effect of AQCE on the morphology of cells	97
4.2. <i>In-vivo</i> anticancer effect of aqueous extract of <i>Acacia catechu</i> (AQCE) on DMBA-induced mammary carcinoma in female	104

Balb/c mice		
4.2.1.	Effect of AQCE on DMBA-induced mammary carcinoma	104
4.2.2.	Effect of AQCE on the TSA and LASA levels in serum and mammary tissue	105
4.2.3.	Effect of AQCE on the lipid peroxidation and nitrite levels in mammary and liver tissue	106
4.2.4.	Effect of AQCE on the antioxidants status in mammary and liver tissue	107
4.2.5.	Histopathological observations	107
4.3.	<i>In-vivo</i> anticancer effect of aqueous extract of <i>Acacia catechu</i> (AQCE) on DMBA/TPA-induced skin carcinogenesis in Balb/c mice	109
4.3.1.	Effect of AQCE on DMBA/TPA-induced tumors in Balb/c mice	110
4.3.2.	Biochemical studies in mouse skin and liver tissue	113
4.3.3.	Histopathological observations	117
4.4.	<i>In-vivo</i> anticancer effect of aqueous extract of <i>Acacia catechu</i> (AQCE) on NDEA-induced hepatocarcinoma in Balb/c mice	118
4.4.1.	Effect of AQCE on body weight and relative liver weight	118
4.4.2.	Biochemical parameters	118
4.4.2.1.	Effect of AQCE on liver injury markers	118
4.4.2.2.	Effect of AQCE on the TSA and LASA levels in serum and liver tissue	120

4.4.2.3.	Effect of AQCE on the lipid peroxidation and nitrite levels in liver tissue	120
4.4.2.4.	Effect of AQCE on the antioxidants status in liver tissue	121
4.4.3.	Histopathological observations	122
4.5.	Phytochemical analysis of <i>Acacia catechu</i> heartwood and isolation of (+) catechin	123
4.5.1.	Qualitative phytochemical screening of <i>Acacia catechu</i> heartwood	123
4.5.2.	Quantitative phytochemical screening of aqueous extract <i>Acacia catechu</i>	124
4.6.	Effect of (+)-catechin on breast cancer	125
4.6.1.	<i>In-vitro</i> studies	125
4.6.1.1.	Anti-proliferation studies on human breast adenocarcinoma (MCF-7) cells	125
4.6.1.2.	Effect of (+)-catechin on the morphology of MCF-7 cells	126
4.6.1.3.	Effect of (+)-catechin on DNA fragmentation in MCF-7 cells	129
4.6.1.4.	mRNA expression studies in MCF-7 cells by RT-PCR	130
4.6.1.5.	Protein expression analysis of p53, NF- κ B (p65), c-jun, bcl-2, bax and caspase-3 in MCF-7 cells by ELISA	132
4.6.2.	<i>In-vivo</i> studies	133
4.6.2.1.	Effect of (+)-catechin on DMBA-induced	133

mammary carcinoma		
4.6.2.2.	Biochemical studies in mouse mammary tissue	134
4.6.2.2.1.	Effect of (+)-catechin on the TSA and LASA levels in serum and mammary tissue	134
4.6.2.2.2.	Effect of (+)-catechin on the lipid peroxidation and nitrite levels	135
4.6.2.2.3.	Effect of (+)-catechin on the antioxidants status in mammary tissues	136
4.6.2.3.	Effect of (+)-catechin on DNA fragmentation in mammary tissue	138
4.6.2.4.	Histopathological observations	139
4.6.2.5.	Immunohistochemistry (IHC) analysis of mammary tissues	139
4.6.2.6.	mRNA expression studies by RT-PCR in DMBA-induced mammary carcinoma in Balb/c mice	144
4.6.2.7.	Protein expression analysis of p53, NF- κ B (p65), c-jun, bcl-2, bax and caspase-3 in mammary tissues by ELISA	146
4.7.	Effect of (+)-catechin on skin cancer	147
4.7.1.	<i>In-vitro</i> studies	147
4.7.1.1.	Anti-proliferation studies on human epithelial carcinoma (A431) cells	147
4.7.1.2.	Effect of (+)-catechin on the morphology of A431 cells	147

4.7.1.3.	Effect of (+)-catechin on DNA fragmentation in A431 cells	150
4.7.1.4.	mRNA expression studies in A431 cells by RT-PCR	151
4.7.1.5.	Protein expression analysis of p53, NF- κ B (p65), c-jun, bcl-2, bax and caspase-3 in A431 cells by ELISA	154
4.7.2.	<i>In-vivo</i> studies	155
4.7.2.1.	Effect of (+)-catechin on DMBA/TPA-induced tumors in Balb/c mice	155
4.7.2.2.	Biochemical studies in mouse skin tissue	158
4.7.2.2.1.	Effect of (+)-catechin on the TSA and LASA levels in serum and skin tissue	158
4.7.2.2.2.	Effect of (+)-catechin on the lipid peroxidation and nitrite levels in skin tissue	159
4.7.2.2.3.	Effect of (+)-catechin on the antioxidants status in skin tissue	160
4.7.2.3.	Effect of (+)-catechin on DNA fragmentation in skin tissue	162
4.7.2.4.	Histopathological observations	162
4.7.2.5.	Immunohistochemistry (IHC) of skin tissues	163
4.7.2.6.	mRNA expression studies by RT-PCR in DMBA/TPA-induced skin carcinoma in Balb/c mice	168
4.7.2.7.	Protein expression analysis of p53, NF- κ B	170

	(p65), c-jun, bcl-2, bax and caspase-3 in skin tissues by ELISA	
4.8.	Effect of (+)-catechin on liver cancer	171
4.8.1.	<i>In-vitro</i> studies	171
4.8.1.1.	Anti-proliferation studies on human hepatocellular carcinoma (HepG2) cells	171
4.8.1.2.	Effect of (+)-catechin on the morphology of HepG2 cells	171
4.8.1.3.	Effect of (+)-catechin on DNA fragmentation in HepG2 cells	174
4.8.1.4.	mRNA expression studies in HepG2 cells by RT-PCR	176
4.8.1.5.	Protein expression analysis of p53, NF- κ B (p65), c-jun, bcl-2, bax and caspase-3 in HepG2 cells by ELISA	178
4.8.2.	<i>In-vivo</i> studies	178
4.8.2.1.	Effect of (+)-catechin on body weight and relative liver weight	179
4.8.2.2.	Biochemical studies in serum and liver tissue	179
4.8.2.2.1.	Effect of (+)-catechin on liver injury markers	179
4.8.2.2.2.	Effect of (+)-catechin on the TSA and LASA levels in serum and liver tissue	179
4.8.2.2.3.	Effect of (+)-catechin on the lipid peroxidation and nitrite levels in liver tissue	181

4.8.2.2.4. Effect of (+)-catechin on the antioxidants status in liver tissue	181
4.8.2.3. Effect of (+)-catechin on DNA fragmentation in liver tissue	183
4.8.2.4. Histopathological observations	183
4.8.2.5. Immunohistochemistry (IHC) liver tissue	184
4.8.2.6. mRNA expression studies by RT-PCR in NDEA-induced hepatocarcinoma in Balb/c mice	188
4.8.2.7. Protein expression analysis of p53, NF- κ B (p65), c-jun, bcl-2, bax and caspase-3 in liver tissues by ELISA	190
5. Discussion and conclusion	191-205
