

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
4.1	Effect of <i>A. catechu</i> heartwood extracts on percent cell viability (MCF-7 cells) using trypan blue exclusion assay	92
4.2	Effect of <i>A. catechu</i> heartwood extracts on percent cell viability (A431 cells) using trypan blue exclusion assay	93
4.3	Effect of <i>A. catechu</i> heartwood extracts on percent cell viability (HepG2 cells) using trypan blue exclusion assay	94
4.4	Effect of AQCE on DMBA-induced mammary carcinogenesis	104
4.5	Effect of aqueous extract of <i>Acacia catechu</i> heartwood (AQCE) on TSA and LASA levels	106
4.6	Effect of AQCE on oxidative stress markers in mammary and liver tissue	108
4.7	Modulatory effect of AQCE and/or DMBA/TPA on skin tumors of Balb/c mice	110
4.8	Effect of AQCE on lipid peroxides (MDA), GST, GSH level and SOD, CAT activities in mouse skin tumors and liver	114
4.9	Effect of AQCE on DMBA-induced hepatocarcinogenesis	119
4.10	Effect of AQCE on the activities of marker enzymes in the serum.	119
4.11	Effect of AQCE on TSA and LASA levels	120
4.12	Effect of the AQCE on oxidative stress markers in mouse liver	121

4.13	Qualitative analysis of different extracts of <i>Acacia catechu</i> heartwood	123
4.14	Effect of (+)-catechin on DMBA-induced mammary carcinogenesis	133
4.15	Effect of (+)-catechin on TSA and LASA levels	135
4.16	Effect of (+)-catechin on oxidative stress markers in mammary tissues	137
4.17	Modulatory effect of (+)-catechin and/or DMBA/TPA on skin tumors of Balb/c mice	155
4.18	Effect of (+)-catechin on TSA and LASA levels	159
4.19	Effect of (+)-catechin on oxidative stress markers in skin tumors	161
4.20	Effect of (+)-catechin on NDEA-induced hepatocarcinogenesis	180
4.21	Effect of (+)-catechin on the activities of marker enzymes in the serum	180
4.22	Effect of (+)-catechin on TSA and LASA levels	181
4.23	Effect of (+)-catechin on oxidative stress markers in mouse liver	182

LIST OF FIGURES

FIGURE NO.	CAPTION	PAGE NO.
1.1	Ten leading cancer types, estimated new cancer cases and deaths by sex in United States, 2012	2
4.1	IC ₅₀ values (µg/ml) of different extracts of <i>Acacia catechu</i> heartwood	95
4.2	Effect of aqueous extract <i>Acacia catechu</i> heartwood (AQCE) on the percentage viability of normal lymphocytes as measured by MTT assay	96
4.3	Morphological evaluation of MCF-7 cells by phase-contrast inverted microscope	98
4.4	Morphological evaluation of A431 cells by phase-contrast inverted microscope	99
4.5	Morphological evaluation of HepG2 cells by phase-contrast inverted microscope	100
4.6	Apoptosis assay by Hoechst and acridine orange/ethidium bromide (MCF-7 cells)	101
4.7	Apoptosis assay by Hoechst and acridine orange/ethidium bromide (A431 cells)	102
4.8	Apoptosis assay by Hoechst and acridine orange/ethidium bromide (HepG2 cells)	103
4.9	Effect of the aqueous extract of <i>Acacia catechu</i> heartwood (AQCE) on the average body weight of mice	105
4.10	Histopathological alterations in mammary tissue with AQCE treatment	109

4.11	Effect of the aqueous extract of <i>Acacia catechu</i> heartwood (AQCE) on the percent incidence of papillomas after 20 weeks of DMBA/TPA application	111
4.12	Effect of the aqueous extract of <i>Acacia catechu</i> heartwood (AQCE) on the average number of papillomas per mouse (papilloma yield) compared with the DMBA treated group	111
4.13	Effect of aqueous extract of <i>Acacia catechu</i> heartwood (AQCE) on percent survival rate of mice	112
4.14	Effect of aqueous extract of <i>Acacia catechu</i> heartwood (AQCE) on average body weight of mice	112
4.15	Histopathological alterations in skin tissue with AQCE treatment	117
4.16	Histopathological alterations in liver tissue with AQCE treatment	122
4.17	HPLC chromatogram of standard [(+)-catechin] (a) and aqueous extract (b) of <i>Acacia catechu</i> heartwood	124
4.18	Morphological evaluation of MCF-7 cells by phase-contrast inverted microscope	126
4.19	Apoptosis assay by Hoechst and acridine orange/ethidium bromide (MCF-7)	128
4.20	Effect of (+)-catechin on DNA fragmentation in MCF-7 cells	129
4.21	DNA fragmentation analysis by agarose gel electrophoresis (MCF-7 cells)	130
4.22	Expression of apoptosis-related genes in MCF-7 cells	131

4.23	Quantitative protein expression in MCF-7 cells by ELISA	132
4.24	Effect of (+)-catechin on the average body weight of mice	134
4.25	Effect of (+)-catechin on DNA fragmentation in mice	139
4.26	Histopathological alterations in mammary tissue with (+)-catechin treatment	140
4.27	Immunohistochemical analysis of p53 expression in mice breast tissues	141
4.28	Immunohistochemical analysis of p65 expression in mice breast tissues	142
4.29	Immunohistochemical analyses of c-jun expression in mice breast tissues	143
4.30	Expression of apoptosis-related genes in mammary tissue	145
4.31	Quantitative protein expression in different groups by ELISA	146
4.32	Morphological evaluation of A431 cells by phase-contrast inverted microscope	148
4.33	Apoptosis assay by Hoechst and acridine orange/ethidium bromide (A431 cells)	149
4.34	Effect of (+)-catechin on DNA fragmentation in A431 cells	150
4.35	DNA fragmentation analysis by agarose gel electrophoresis (A431 cells)	151
4.36	Expression of apoptosis-related genes in A431 cells	153

4.37	Quantitative protein expression in A431 cells by ELISA	154
4.38	Effect of (+)-catechin the on the percent incidence of papillomas after 20 weeks of DMBA/TPA application	156
4.39	Effect of (+)-catechin on the average number of papillomas per mouse (papilloma yield) compared with the DMBA treated group	157
4.40	Effect of (+)-catechin on percent survival rate of mice	157
4.41	Effect of (+)-catechin on average body weight of mice	158
4.42	Effect of (+)-catechin on DNA fragmentation in mice	163
4.43	Histopathological alterations in skin tissue with (+)-catechin treatment	164
4.44	Immunohistochemical analysis of p53 expression in mice skin tumors	165
4.45	Immunohistochemical analysis of p65 expression in mice skin tumors	166
4.46	Immunohistochemical analysis of c-jun expression in mice skin tumors	167
4.47	Expression of apoptosis-related genes in skin tissue	169
4.48	Quantitative protein expression in different groups by ELISA	170
4.49	Morphological evaluation of HepG2 cells by phase-contrast inverted microscope	172
4.50	Apoptosis assay by Hoechst and acridine orange/ethidium bromide (HepG2 cells)	173
4.51	Effect of (+)-catechin on DNA fragmentation in HepG2	175

	cells	
4.52	DNA fragmentation analysis by agarose gel electrophoresis (HepG2 cells)	175
4.53	Expression of apoptosis-related genes in HepG2 cells	177
4.54	Quantitative protein expression in control HepG2 cells	178
4.55	Effect of (+)-catechin on DNA fragmentation in mice	183
4.56	Histopathological alterations in liver tissue with (+)-catechin treatment	184
4.57	Immunohistochemical analysis of p53 expression in mice liver	185
4.58	Immunohistochemical analysis of p65 expression in mice liver	186
4.59	Immunohistochemical analysis of c-jun expression in mice liver	188
4.60	Expression of apoptosis-related genes in liver	189
4.61	Quantitative protein expression in different groups by ELISA	191
5.1	Proposed mechanism of (+)-catechin against multiorgan carcinoma	205
