

## LIST OF FIGURES

<b>Figure No.</b>	<b>Title</b>	<b>Page No.</b>
1.1	The overall structure of feature recognition system	6
3.1	Hierarchy of geometrical strings	18
3.2	Partial lines from STEP file for cylinder recognition	22
3.3	Data extraction from STEP file for cylinder recognition	23
4.1	Flow chart for cylindrical feature recognition	26
4.2	Cylindrical feature geometry	27
4.3	Addition of a cylinder	28
4.4	Cylindrical hole feature geometry	28
4.5	Cylindrical online feature geometry	29
4.6	Cylindrical offline feature geometry	30
4.7	Cylindrical hole through or blind geometry	30
4.8	Cylindrical hole inclined to external cylinder axis geometry	31
4.9	Conical feature geometry	32
4.10	Conical hole feature geometry	32
4.11	Flow chart of curvature feature recognition	34
4.12	Geometry of external toroidal features	35
4.13	Geometry of internal toroidal features	36
4.14	Spherical feature geometry	37
4.15	Flow chart for cylindrical cross hole feature recognition	39

4.16	Cross hole passing through axis line geometry	40
4.17	Cross hole offset from axis line geometry	41
4.18	Cross hole inclined to axis line geometry	42
4.19	Cross hole through or blind feature geometry	42
5.1	Flow chart for keyway feature recognition	44
5.2	Slot feature geometry	45
5.3	Keyway feature geometry	46
5.4	Elliptical feature geometry	46
5.5	Showing pitch and bounded surface on knuckle thread	48
6.1	First window asking filename	50
6.2	Second window opens after entering STEP file name	51
6.3	Drop down items of 'window' menu item	51
6.4	FOB Table window showing extracted data about face outer bound	53
6.5	FB Table window showing extracted data about face bound	53
6.6	FOB vertex table window showing extracted data about coordinates	54
6.7	PLANE table window showing extracted data about plane	54
6.8	CIRCLE table window showing extracted data about circle	55
6.9	MAIN table window showing summary of extracted data	55
6.10	FEATURE table window showing feature details	56
6.11	Case study1 drawing	57
6.12	Addition and subtraction of cylinders in case study1	57
6.13	Output of the case study1	58
6.14	Case study1 with recognized features	58
6.15	Output of the MAIN table for case study1	59
6.16	Longitudinal cylinder	60

6.17	Addition of cylinder B to cylinder A	60
6.18	Subtraction of cylindrical hole	61
6.19	Subtraction of conical hole	61
6.20	Case study 2 drawing	62
6.21	Case study 2 with recognized features	62
6.22	Output of case study 2	63
6.23	Output of the MAIN table for case study 2	64
6.24	Circle center coordinates for each cylinder of case study 2	64
6.25	Case study 3 drawing	67
6.26	Output of the MAIN table for case study 3	68
6.27	Case study 3 with recognized features	69
6.28	Output of case study 3	70
