ACKNOWLEDGEMENTS

It is a great pleasure to acknowledge my indebtedness to distinguished teacher and my Research Director Prof. Ch. Bharathi, M.Sc., Ph.D., who guided me with constant encouragement, constructive criticism, valuable suggestions and untiring efforts and I received warm and affectionate treatment throughout the course of the present work.

My grateful thanks are due to Prof. P. Chandra Mohan for his keen interest in my work, unstained co-operation and valuable suggestions at every stage in the preparation of this thesis. I am particularly indebted to him for his critical final appraisal and concern.

I am grateful to Prof. K. Sreeramulu Head, Prof. D.E. Babu Former Head, Department of Zoology, Andhra University for their timely help, encouragement and for providing necessary facilities.

I am glad to record my appreciation and heartfelt thanks to Prof. Y. Prabhakar Rao, Prof. B.V Sandeep, Prof. C. Annapurna for their timely suggestions, constant encouragement and kind cooperation throughout the period of study which propelled me forward in the right path to achieve this task.

I express by deep sense of gratitude to my beloved friends and co-scholars, Mr. Ch. Krishna Murthy, Mr. Ch. Subramanyam, Mr. S. Rakesh, Mr. Madhusudhan Rao for their cooperation and encouragement in the laboratory during the course of study.

I express my thanks to my mother Smt.D. Jayalaxmi, my brothers Mr.D.Vasu Babu and Mr.D. Kumar Babu, my wife Smt.D. Sunitha, and my beloved sister-in-law Kranthi and family members for creating the congenial atmosphere to look after my research work without family burden at the expense of their love and affection during the investigation.

I would like to thank to all the Teaching & non-teaching staff of the Department of Zoology Andhra University for their cooperation and encouragement.

My thanks are due to the authorities of Andhra University for providing excellent facilities.
