

Acknowledgement

The constant diligence, patience and struggle have finally taken a shape in form of my thesis titled “Molecular characterization of virulent isolates of Tomato leaf curl virus”. This has not been a reality without my mentor, Dr. Supriya Chakraborty’s constant support, guidance and invaluable advice. He has been the guiding light in shaping up my organic thoughts into substantial results. Further, Dr. R. Madhubala, Dr. R. N. K. Bamezai, Dr. P. K. Yadav and Dr. R. K. Kale have always been a great help and facilitator in form of the School’s Dean. Dr. B. Chattopadhyay and Dr. A. K. Singh have been a constant academic and moral support since my initial days in the lab. My work and experiments got nurtured because of the unremitting shore up by Dr. A.K. Nandi. In addition to this senior faculties namely Dr. B. Tripathi, Dr. N. Sarin, Dr. A. K. Pareek , and Dr. Rajendra Prasad have been extremely kind and supportive by providing the much needed guidance. Dr. A. K. Johari has always been considerate in extending all possible help.

The initial moral support that I received in the form of encouraging words from Kamlesh di and Safdar, which is persisting till now is invaluable. The support that I got from my labmates such as Junaid, Tribhuvan, Garima, Uday, and Aarzo is worth mentioning. Several senior research scholars from School of Life Sciences helped me with their sincere piece of advice and timely suggestions. To name a few of them, Rashmi di, Jyoti di, Babita mam, Tara mam, Gautam Sir, Ankush Sir, Sivesh Sir. In addition to these, Rishikesh, Swadhin, Swati, Vijeta, Anuradha and Santosh have helped substantially in the completion of this work. All of these people have always been extremely considerate and patient in listening to my academic queries. Saumik Basu and Sandeep have rendered me all the necessary and much needed help and efforts.

Further, I am blessed to befriend Shweta, Maansi and Rajni who have helped me in regaining time and again. Their encouraging words have always echoed in my ears to let me meet all the challenges. Apart from this Chandramohan, Biplab, Sumant, Neha, Goldi, Nadha, Monika, Narendra, Ekta, Somlata, Reshma, Poppy, Reena, Sanjay, Ajeet have always been very kind and generous in extending all the possible effort. My present

labmates namely Biju, Nirbhay, Virendra, Mashood, Vinoth, Ujjaval, Abhishek, Prabhu Madhurendra, Dhriti have been extremely co-operative in making all the possible arrangements for the smooth experimentations.

Lastly, my Papa Ma deserve a profound thanks, who always showered there love and blessings by providing the much needed freedom and support to pursue my independent ideas and academic choices. My husband Rakesh has been the bedrock of support behind the successful completion of my research work. My in-laws have been commendably patient, generous and helpful in providing me the much needed affection and support. I cannot do away without thanking my sisters Suman and Rupa and my brother Appu, Ravi and Rajesh who stood by me through thick and thin.

Towards the end I would like to express my deep gratitude towards the man who laid the foundation of academic thirst in me, Prof. Om Prakash Dutta, he who taught me through my school, post-graduation.
