Acknowledgement

By the grace of God, on successfully completion of thesis work, I take the opportunity & privilege to express my gratitude and veneration to express to all the people who helped me during the course of my research work. Though words are not sufficient to express my appreciation for them.

First of all, I would like to give my profound gratitude to my supervisor Prof. B.C.Tripathy, School of Life Science, JNU. I am indebted to him for the constant encouragement, support, invaluable guidance and critical evaluation throughout the tenure of this study. His scientific temperament, meticulous thinking and scholarly expertise helped me all along my work. He have not only provided me with the direction, technical support, and facilities for my work but also given me ample liberty to express my views, and experiment with my own ideas. His full faith and trust in me, inculcated self-confidence and determination within myself to achieve my goal. It has been my privilege to work with him. His affection and hearty co-operation throughout this study has laid the foundation for a personal camaraderie beyond the teacher-student relationship that I’ll cherish for all my life.

I am extremely thankful to the incumbent and the former faculty members of the School of Life Sciences for generating all necessary facilities and conducive environment for carrying out the present work and also for so patiently teaching us during our course work. I would sincerely acknowledge my thanks to the present Dean, Prof. R. Madubala and all the former deans Prof. K.C.Upadhaya, Prof. Alok Battacharya, Prof. R. N. K. Bamezai, Prof. P. K. Yadava and Prof. R. K. Kale for providing a conducive atmosphere for research and making the School of Life Sciences an example of an extended family working in a coordinated fashion.
I owe my most sincere gratitude to Dr. B. S. Tiwari for all those scientific discussions that had helped me in nurturing my scientific aptitude and helping in my difficult moments.

I would like to thank to my seniors Rupesh sir, Ajay sir, Suchi mam, Gopal sir, Ansuman sir, and Siddhartha sir, without whose generous guidance, essential instructions and constant encouragement, during the initial phase of my Ph.D, this thesis would have been a tough task.

I cordially thank my present lab-mates in JNU Dr. Ardhendu, Dr. Satpal, Naveen, Vijay, Namrata, Jay, Ashutosh, Kamal, Manas, Deepika, Somya, Sampurna, Ram and chitra for their enjoyable work ambience which diminished the tight lab work. At this juncture I especially thank Shiv and Vivek who were always there for me whenever I needed their help.

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. I have been accompanied and supported by many people during my thesis work. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them namely Santosh, Ramesh, Gajinder, Pradumn, Ujala, Ratnesh and Anupma.

This letter of acknowledgement will not be complete without mentioning the names of my friends at SLS Ravi, Shiteshu, Ratnakaran, Manish, Mrunmay, Ashraf, Praveen, Swadhin, Akhil, Anita, Antresh, Ramgopal who were always there for all the support, discussions and help with one or the other chemicals/reagents in emergency situations.

My heartfelt gratitude towards the SLS staff, especially Meenu Ma'am. Without her help it would have been difficult to complete this work smoothly.

I thank all the CIF members of SLS, especially Dr. Alexander, Dr. Sharma, Mr. Khan, Mr. Mishra Mr. Rajinder, Mr. Mehfooz, Mr. joginder, Faiz and the staff of CIF, SLS for their immense help and co-operation. I also thank Balwant and Aslam for their cooperation.
I want to show my gratitude towards Shramajee and Gajinder ji, TEM counsellor of AJF, JNU, for helping me lot during electron microscopy experiment.

I wish to express my thanks to Mr. Sumer Singh for his full cooperation in official hassles. Day to day help of Naresh, Ramesh, Baljit, Nathu and Ganesh is duly acknowledged.

I sincerely acknowledge Council for Scientific and Industrial research (CSIR) and DBT for providing financial assistance without which this work wouldn't have seen the light of day.

Words are certainly incapable and expressionless in expressing my indebtedness to my parents. I feel fortunate enough to be born and brought up in a happy family of mutual love and affection. Every bit of my success I owed it to them. My special gratitude is due to my brother and sister for their constant support and encouragement. I am privileged to have a family where unconditional support of love and affection has grown me up stronger and stronger mentally and socially.

Last, but not least, I would like to thank my wife Megha for her understanding, unconditional support and love which helps in creating a positive and joyful environment at home. Her support and encouragement was in the end what made this thesis possible.

The chain of my gratitude would be definitely incomplete if I would forget to thank the first cause of this chain, The Almighty, The Prime Mover, whom I have great faith in and by whose blessings I have been able to reach this milestone. I pray to him to bless me always and enlighten me towards the path of a meaningful and successful life, not only as a good scientist but also as a good human being.
