ACKNOWLEDGEMENTS

Words cannot express my immense gratitude to the people who have helped me to accomplish this mammoth work of writing a doctoral thesis. I take this opportunity to acknowledge all support, guidance, encouragement, concern and friendship they have given to me.

My greatest obligations are for respected research supervisor and mentor Professor K. Hans Raj, who with his proficient guidance, scientific expertise, concern and unfeigned support has been the reliance throughout the work. He gave me the opportunity to join his research group, and taught me the importance of focus, quality and rigor in research. I remember at this juncture, the kind of motivational uplift, in a very lovable way, he used to render to me all the times when I was all low in my morale. I regard the benevolence and patience in him with which he tolerated all my flaws and continued to have faith in me. He is an incredible man of keen scientific and academic acumen and I shall remain in debt to him forever and for all his help during the course of work and for everything that he taught me.

My next obligation goes to my co-supervisor Dr. Vishal Sahni, who has been an inspirational source for me throughout the course of study. He is a man of great academic brilliance. The way he confronts the challenges and does work in real agility, are the characteristics which I have imbibed from him. Without his support, encouragement and guidance, this thesis work would not have been possible.

It is a matter of great honor and privilege to have worked under such pedagogy.

I am extremely thankful and would like to extend sincere gratitude to Dr. Rahul Swarup Sharma for his continued stimulus and trustworthy encouragement to accomplish this titanic task.

I extend my sincere thanks to Prof. D. S. Mishra, Head (Mechanical Engineering) and Dean, Faculty of Engineering for his kind co-operation and support throughout the work.
I am extremely grateful to Prof. V.G. Das, Director, D.E.I. and Prof. Anand Mohan, Registrar, D.E.I. for their encouragement, support and blessings all through the research work.
I gratefully acknowledge the help of Prof. V. M. Kumar, Professor Emeritus, Prof. P. K. Kalra, IIT-Delhi, Dr. Lionel Fourment of CEMEF Laboratory, France, for giving me invitation to visit France, Prof. Alok Verma, Lean Institute, Old Dominion University, Norfolk, U.S.A. and Prof. Suren N. Dwivedi University of Louisiana at Lafayette, U.S.A.

I am thankful to Sh. K. S. R. Murty, Prof. P. K. Kalra, IIT-Kanpur, Prof. V. Prem Pyara, Prof. C. Patvardhan, Prof. Ranjit Singh, Prof. D. K. Chaturvedi, Prof. A. K. Saxena, Prof. S. K. Gaur, Prof. D. G. Rao, Prof. Rahul Caprihan, Prof. S. K. Srivastava, Dr. Surat Kumar, Dr. D. Bhagwan Das, Dr. K. Santi Swarup, Dr. G. S. S. Babu, Dr. K. Srinivas, Dr. Ashish Saini, Dr. Ratan Saini, Shri Padam Das, Mr. Vijay Malhotra, Head, Automobile Engineering Department, Technical College and Prof. Soami Piara Satsangee, Incharge, U.S.I.C., for their kind elderly concern, continuous encouragement and interest for Ph.D. work.

I am highly thankful to my friends and colleagues Mr. Ankit Sahai, Mr. Shanti Swarup Sharma, Mr. N. L. Mahato, Mr. Ashish Mani, Mr. R. S. S. Prashanth, Mr. C. Dayal Saran, Mr. Sandeep Ghai, Mr. Vikas Upadhyay, Mr. Himanshu Vijay, Mr. Sanjeev Kumar, Mr. Bhupesh Satsangi, Mr. Bhuvnesh Singhal, Mr. Y. K. Anand, Mr. Atul Suri, Mr. Atul Dayal, Mr. Anami Saran and Mr. Rajesh Kumar for their candid opinions and remarks offered to me time to time regarding the research work.

I am also thankful to Mr. Sikander, Mr. Narendra Singh and Late Shri Diwan Singh for helping me when it was most required.

I owe my sincere thanks to Dr. P. K. Sinha, Assistant Registrar (Academic), Mrs. V. Radha and Mrs. Gogia for their silent support. They were extremely helpful throughout the tenure of Ph.D. and have patiently taken up the queries and rectified the same very quickly and favorably.

I would also like to extend my gratitude to Prof. (Mrs.) K. Maharaj Kumari and my young friend K. Mohit for all their support all along.
I have no words to express deep gratefulness and profound respect to my mother Smt. Shalini Setia. All the credit goes to her for what I am today. I am also indebted to my parents-in-law Mr. Vijay Singh and Smt. Saran Pyari, and younger sisters Mrs. Rachna Sharma and Mrs. Rashmi Kundra for their consistent support and encouragement.

I am deeply indebted to my wife, Dr. Seema Setia, for her continuous encouragement and unconditional support throughout the course of research. She was always there with me and acted as a light house whenever I was baffled in the labyrinthine task of completing Ph.D. I am indeed quite fortunate to have a wife like her. My children Mohak and Akarsha deserve to be mentioned here and would like to thank them for giving me some joyful moments from time to time which deflated the work pressure.

I would like to gratefully acknowledge the support from ADRDE (DRDO) Agra’s consultancy projects and R&D projects of DST, UGC and AICTE.

Finally, I find no way to express my feeling of sincere gratitude to my father Late Dr. Guru Prasad Setia who provided the early stimulus and enthusiasm to undertake the research work since my graduation. All the credit goes to him for what I am today and I shall remain indebted to him throughout my life.

*Had he been alive he would be the happiest man to see what I am today.*

Rajat Setia
