INTRODUCTION OF THE TOPIC OF STUDY AND CHAPTERWISE SUMMARY OF THE THESIS

CHAPTER 1

1.1	Background and Importance of Fractional Calculus Operators and Geometric Function Theory	1
1.2	Basic Definitions	7
1.2.1	Univalent Function	7
1.2.2	The class of starlike functions	10
1.2.3	The class of convex functions	12
1.2.4	Sakaguchi Type functions	14
1.2.5	Multivalent functions	15
1.3	Some Properties in Geometric Function Theory	17
1.3.1	Fekete - Szegő inequality	17
1.3.2	Hadamard product (or Convolution)	19
1.3.3	Subordination Property	20
1.4	Brief Chapter wise Summary	22
1.5	List of Papers Published / Accepted / Communicated for Publication	24
	References	26

CHAPTER 2

FEKETE-SZEGÖ INEQUALITIES FOR GENERALIZED SAKAGUCHI TYPE FUNCTIONS AND THEIR APPLICATIONS TO FRACTIONAL DERIVATIVE OPERATOR

2.1.	Introduction	42
2.2.	Main Results	45
2.3.	Generalized Classes $S^g(\varphi, s, t)$ and $T^g(\varphi, s, t)$	54

References	65
------------------	----

CHAPTER 3

SOME STARLIKE AND CONVEXITY PROPERTIES OF SAKAGUCHI CLASSES

3.1 Introduction	69
3.1.1 Lemma Sufficient conditions for $S(\alpha, t)$ and $C(\alpha, t)$	70
3.2 Main Results	71
References	78

CHAPTER 4

SOME INEQUALITIES INVOLVING SAIGO'S GENERALIZED FRACTIONAL INTEGRAL OPERATOR

4.1 Introduction	81
4.1.1 Definition of some fractional Integral Operator.....	82
4.1.2 Definition for $f(z)$ to lie in C_μ	83
4.1.3 Definition for $f(z)$ to lie in C_μ^n	83
4.2 Main Results	83
References	94

CHAPTER 5

COEFFICIENT INEQUALITIES OF MULTIVALENT FUNCTIONS AND CHARACTERIZATION AND SUBORDINATION PROPERTIES FOR λ -SPIRALLIKE GENERALIZED SAKAGUCHI TYPE FUNCTIONS

5.1 Introduction of section A	98
--	----

5.2 Main Results	99
5.3 Coefficient Inequalities For Subclasses $S_p(\alpha, s, t)$ and $C_p(\alpha, s, t)$	102
5.4 Distortion Inequalities For Subclasses $S_p(\alpha, s, t)$ and $C_p(\alpha, s, t)$	108
5.5 Introduction of section B	111
5.6 Main Results	113
5.7 Subordination Property	117
References	122

CHAPTER 6

SUFFICIENT CONDITIONS FOR GENERALIZED SAKAGUCHI TYPE FUNCTIONS OF ORDER B

6.1 Introduction	126
6.1.1 Lemma defined in the complex plane for $p(z)$	126
6.2 Sufficient conditions for the function $f(z) \in S_n(\beta, s, t)$	127
References	138
