

LIST OF TABLES

S. No.	Table No.	Title	Page No.
1.	4.1	Reliability of Tests by Alternate Forms Method	69
2.	4.2	Reliability of Tests by Kuder – Richardson Formula	70
3.	4.3	Decision Matrix on MAT vs. PMAT for CAIM in Algebra	72
4.	4.4	Decision Matrix on CAT vs. PCAT for CAIM in Calculus	72
5.	4.5	Decision Matrix on NAT vs. PNAT for CAIM in Numerical Analysis	72
6.	4.6	Decision Matrix on MCT vs. PMCT for CAIM in Mathematics	73
7.	4.7	Interpretation of Kappa Statistics	74
8.	4.8	Computation for Reliability of Developed Tools	75
9.	4.9	Results of paired t-test for CAIM	76
10.	4.10	Learning Gain Scores for CAI	77

11.	5.1	Results of paired t-tests for experimental group and control group from Pre to Post I stage in selected subject area of Mathematics.	89
12.	5.2	Results of paired t-tests for experimental group and control group from Pre to Post II stage in selected subject area of Mathematics.	90
13.	5.3	Results of independent t-test between experimental group & control group at Pre stage in selected subject area of Mathematics.	91
14.	5.4	Results of independent t-test between experimental group & control group at Post I stage in selected subject area of Mathematics	92
15.	5.5	Results of independent t-test between experimental group & control group at Post II stage in selected subject area of Mathematics	93
16.	5.6	Comparison of Learning Gains of CAI and Conventional Method in Attaining & Retaining all specified Mathematical Concepts	94
17.	5.7	Results of paired t-tests for experimental group and control group from Pre to Post I stage in attaining all specified	95

Mathematical Concepts

- | | | | |
|-----|-----|--|----|
| 18. | 5.8 | Results of paired t-tests for experimental group and control group from Pre to Post II stage in retaining all specified Mathematical Concepts | 96 |
| 19. | 5.9 | Results of independent t-test between experimental group & control group for all specified Mathematical Concepts at Pre Stage, Post I Stage & Post II Stage. | 97 |
