Incidence and significance of candiduria.

274. Knight L, Fletcher J.
Growth of candida albicans in saliva : Stimulation by glucose
associated with antibiotics, corticosteroids and diabetes mellitus.

The prevalence of yeasts in clinical specimens in cancer patients.

276. Wingard JR, Merz WG, Saral R.
Candida tropicalis : A major pathogen in immunocompromised patients.
277. Samaranayake L P and MacFarlane T W.
The effect of dietary carbohydrates on the in vitro adhesion of Candida albicans to epithelial cells.

278. Samarnayake Y F, Wu P C, Samaranayke L P, SOM and Yuen K Y.
Adhesion and colonisation of Candida krusei on host surfaces.

279. Chakrabarti A, Reddi TCS, Singhi S.
Does candiduria predict candidemia?

280. Baradkar et. al.
Isolation and characterization of Candida in AIDS.

281. Muerkoestar CG, Richard AK, Farmer SG.
A comparison of hyphal growth of Candida albicans in 6 liquid media.
Sabouraudia 1979, 17, 55-64.

282. Land GA, McDonald WC, Stejernholm RL and et. al.
Infect. Imm. 1975, 12, 119-127.

283. Martin MV, Frank HW.
A Microbiologic and Ultrastructural Investigation of Germ tube formation by oral strains of Candida tropicalis.

284. Pandalai, NG and Kurup PV.
The occurrence of Candida species in the sputum of patients with broncopulmonary diseases.

285. Grower S, and Junnarkar RV.
Mycological flora in sputum of patients suffering from bronchopulmonary diseases.

286. Mackowiak. Philip A.
Microbial synergism in human infections.

286. Allen SD and Duerden BL.
Infections due to non-sporing anaerobic bacilli and cocci.
287. Brooks RG, Hofflin JM, Jamieson SW and et. al.  
Infectious complications in heart-lung transplant recipients.  

288. Dyess DL, Garrison RN, Fry DE.  
Candida sepsis.  

289. Burchard KW, Minor LB. Slotman GJ et.al.  
Fungal sepsis in surgical patients.  

290. Carlson E.  
Synergistic effect of Candida albicans and Staphylococcus aureus, on mouse mortality.  

291. Klein JJ, Watakunakorn C.  
Hospital acquired fungemia.  

292. Hunter PR and Fraser C.  
Use of modified resistogram to type Candida albicans isolated from cases of vaginitis and from faeces in same geographical area.  

293. Martin MV, and Wilkinson GR.  
The oral yeast flora of 10-year old school children.  

294. Phongpaichit S, Mackenzie DWR and Fraser C.  
Strain differentiation of Candida albicans by morphotyping.  

295. Kakru DK, Thoker MA, Sofi BA, Mir MM and Shah A.  
Correlation of Morphotyping and extra-cellular proteinase production as virulence marker in Candida albicans.  

296. McCreight MC, Warnock DW and Martin MV.  
Resistogram typing of Candida albicans isolates from oral and cutaneous sites in irradiated patients.  

297. Dick JD, Merz WG, Saral R.  
Incidence of polyene-resistant yeasts recovered from clinical specimens.
