

Preface

Abstract

Chapter-1

INTRODUCTION

1.1 Towards Intelligent Control	1
1.2 Basics of pH Control	3
1.2.1 Modeling of pH process	3
1.2.2 Description of pH process	5
1.3 Techniques in pH Control	7
1.3.1 Advanced control techniques	7
1.4 Motivation	9
1.5 Neural Network Background	10
1.6 Neural Nonlinear Modeling	13
1.6.1 Design of Experiment for Data Collection	16
1.6.2 Selection of Model Structure	18
1.6.3 Model Estimation / Identification	19
1.6.4 Validation of Model	21
1.7 Neural Network based Control Approaches	23
1.8 Nonlinear Internal model control using Neural Networks	25
1.8.1 The Internal Model Control Structure	26
1.8.2 Nonlinear Internal Model Control Scheme	26
1.8.3 Incorporating ANN in IMC Scheme	29
1.9 Review of Advanced pH control Practices	30
1.10 The Problem Statement	36

Chapter-2

IDENTIFICATION OF SIMULATED pH PROCESSES

2.1 Introduction	39
2.2 The CSTR-pH Process	40
2.2.1 Mathematical model of CSTR-pH process	41
2.2.2 Neural network model of CSTR-pH process	45
2.2.3 Study on effects of different parameters on the model validation	50
2.2.4 Results and discussion	58
2.3 The Inline-pH Process	66
2.3.1 Mathematical model of Inline-pH process	67
2.3.2 Neural network model of an Inline-pH process	72
2.3.3 Study on effects of different parameters on the model validation	79
2.3.4 Dead time compensation in neural modeling	85
2.3.5 Results and discussion	86
2.4 Concluding Remarks	92

Chapter-3

CONTROL OF SIMULATED pH PROCESSES

3.1 Introduction	93
3.2 Benchmark Controllers	98
3.3 PID Control of pH Processes	98
3.3.1 PID control of CSTR-pH process	100
3.3.2 PID control of Inline-pH process	105
3.4 Feed Forward Control of pH Processes	110
3.4.1 Feed forward-feedback control of CSTR-pH process	110
3.4.2 Feed forward-feedback control of Inline-pH process	115
3.5 ANN-IMC Control of pH Processes	120
3.5.1 Internal model control scheme	121
3.5.2 Incorporating the ANN model into the IMC design	122
3.5.3 ANN-IMC control of CSTR-pH process	124
3.5.4 Incorporation of a feed forward control into the IMC scheme	133
3.5.5 ANN-IMC control of the Inline-pH process	135
3.5.6 Results and discussion	143
3.6 Additive Internal Model Control (AIMC) of pH Processes	144
3.6.1 Incorporating ANN in the additive internal model control	145
3.6.2 ANN-AIMC control of CSTR-pH process	145
3.6.3 ANN-AIMC control of Inline-pH process	155
3.6.4 Results and discussion	158

3.6.5 Studies on the controller contributions	158
3.6.6 Performance of the AIMC controller for non-constant disturbances	161
3.7 Concluding Remarks	164

Chapter-4

CONTROL OF REAL pH PROCESSES

4.1 Introduction	166
4.2 CSTR-pH Process	167
4.2.1 Description of the plant	167
4.2.2 The ANN-IMC controller	169
4.2.3 Experimental results	170
4.3 The In-line pH Process	174
4.3.1 Description of the plant	175
4.3.2 Necessary modifications done in the basic setup	176
4.3.3 The ANN-AIMC controller	177
4.3.4 Experimental results	178
4.3.5 Performance evaluation in the absence of the conventional controller	182
4.4 Concluding Remarks	183

Chapter-5

CONCLUSIONS	186
