ACKNOWLEDGEMENTS

I would like to express my deepest sense of gratitude to my supervisor, Prof. Asis Datta for his excellent guidance, great deal of encouragement, enthusiasm and friendly discussions throughout the progress of this work. I am greatly indebted to him for teaching me the concepts and techniques of Molecular Biology and for inculcating scientific temper in me. It is a pleasure to acknowledge my indebtedness to Dr. Sudhir Sopory, Associate Professor, for his keen interest, critical comments and valuable suggestions. I take this opportunity to thank Prof. Chen C-m, Professor of Life Science, University of Wisconsin-Parkside, Kenosha, Wisconsin 53141 for answering my queries and offering suggestions on hormone binding in plants. Barley seeds were generously supplied by Dr. Yashvir Singh.

My thanks are due to Prof. Datta, Dean, School of Life Sciences and former Deans Prof. Sivatosh Mookerjee and Prof. P.C. Kesavan for allowing me to use necessary facilities in the School. My thanks go to Prof. H.K. Das for letting me use his laboratory facilities.
Aniruddha for their friendly co-operation and help in numerous ways during the course of work. I particularly appreciate Bipasha, Shoba, Rai, Malaya, Natarajan, Raghu, T.V.G. Rao, Ashok, Asha for critically going through the manuscript and doing the tedious job of proofreading.

I wish to express my sincere thanks and respect to all my teachers. It is a pleasure to thank Vishnu, Shanker, Prusti, L.V.M. Rao, Murthy, Ashok Shekar, Asis Chakravarty, Rajesh, Rajashekher, Gokul, Ramaswamy Manoharan, Mayanil, Gurucharan, Pratima, Megano, Mary, Amar, Narsaiah, Rina, Meeta, Hareesh, Arun, Vijay, Rita and all other friends in the School who helped me in some way or the other.

I am grateful to Prof. Stanley Roux, University of Texas at Austin, U.S.A. and Dr. Sopory for providing purified calmodulin and to Dr. N.K. Gupta, University of Nebraska for his generous gift of E. coli aminoaeryl synthetase. I sincerely thank Sri G. Ramamurthy and Dr. S.M. Reddy for their constant help and encouragement throughout my academic career.

My thanks are due to Bishnupada Mondal and Chhotelal for their expert laboratory assistance and
to Mr. A.C. Alexander, Khan and Kirpal Singh for technical assistance and timely help. I take this opportunity to thank Mr. R.N. Saini, Deepankar and Chinmoy for making excellent line diagrams and photographs; to Gajanan Hegde and Ram Prasad for typing the draft. I appreciate the expert typing and co-operation of Ahuja and Shankar (M/s Friends Typewriter Company).

Mere words are inadequate to express my profound gratitude and respect for my parents who have been an everlasting source of inspiration, without which I would not have reached the present stage. My heartfelt thanks are due to my sisters, brother, and brothers-in-law for their love, understanding and help in a number of ways. I wish to thank Ms Sarojini, Ms Sunita, A.V. Reddy and K.V. Reddy for their moral support.

Financial assistance provided by Council of Scientific and Industrial Research, New Delhi, in the form of fellowship is highly acknowledged.

A.S.N. REDDY
