ACKNOWLEDGEMENT.

I am deeply indebted to Dr. P.K. Ranjekar, Scientist, Division of Biochemical Sciences, National Chemical Laboratory, Pune 411 008, India, for his valuable guidance and encouragement throughout the course of this investigations in the present thesis.

I am grateful to Dr. John Barnabas, Head Division of Biochemical Sciences for his keen interest in my present adventure. Without his support, my progress in research would have been rather slow. My sincere thanks to Dr. R. A. Mashelkar, Director, NCL for his permission to submit my investigations in the form of thesis and for his appreciation of the work.

I appreciate the whole hearted help of Bhaskar G. Patil (my brother) and D.V. Gokhale for helping me to carry out the experimental work, in time. I take this opportunity to thank Dr. V. Shankar for his timely suggestions.

The cooperation from U.S. Puntambekar, Yogesh Mawal, Vivek Verma and S.T. Dhume is worth to note. Master Ajit Ranjekar deserves thanks for bringing out this typed material in a record time. I also thank all the colleagues of my division for their full support.

Finally, words are not enough to express the affection and inspiration that I have received from my family members, during the entire course of this research, without which this thesis would never have been a reality.

S.G. Patil.
