	DEDICATION	
	DECLARATION BY STUDENT	i
	DECLARATION BY GUIDE	ii
	ACKNOWLEDGEMENT	iii
	CONTENT	iv
	ABSTRACT	ix
	LIST OF TABLES	xi
	LIST OF FIGURES	xxiii
	SYMBOLS	xxvi
	ABBREVIATIONS	xxix
<b>Chapter 1</b>	<b>INTRODUCTION</b>	<b>1 - 6</b>
1.1	Introduction	1
1.2	Earthquake resistant design approaches	1
1.2.1	Conventional approach	1
1.2.2	Modern approach	2
1.2.2.1	Passive control system	3
1.2.2.2	Active control system	4
1.2.2.3	Hybrid control system	4
1.3	Objectives	4
1.4	Outline of thesis	5
<b>Chapter 2</b>	<b>LITERATURE REVIEW</b>	<b>7 - 31</b>
2.1	Introduction	7
2.2	Brief history of base isolation	7
2.3	Modern base isolation systems	9
2.3.1	Elastomeric bearing	9
2.3.1.1	Laminated rubber bearing system (LRB)	9
2.3.1.2	New Zealand system (NZ)	10
2.3.2	Sliding isolation system	11
2.3.2.1	Pure friction system (PF system)	11
2.3.2.2	Friction pendulum system (FPS)	13
2.3.2.3	Conical friction pendulum system (CFPI)	15
2.3.2.4	Variable friction pendulum system (VFPI)	16

2.3.3	Combined elastomeric and sliding system	20
2.3.3.1	Resilient-Friction base isolator (R-FBI)	20
2.3.3.2	Electric de France system (EDF)	21
2.3.3.3	Sliding Resilient-Friction (S-RF)	21
2.4	Base isolation for near-field and low frequency ground motion	22
2.5	Concluding remarks	26
<b>Chapter 3</b>	<b>MATHEMATICAL FORMULATIONS FOR RESPONSE OF STRUCTURES ISOLATED WITH CURVED SLIDING SURFACE</b>	<b>32 - 44</b>
3.1	Introduction	32
3.2	Analysis of structure isolated with curved sliding surface	33
3.3	Mathematical formulation for constant coefficient of friction	34
3.3.1	Non sliding phase	37
3.3.2	Beginning of sliding phase	38
3.3.3	Sliding phase	39
3.3.4	Direction of sliding	43
<b>Chapter 4</b>	<b>PERFORMANCE OF SLIDING ISOLATION SYSTEM SUBJECTED TO FAR-FIELD GROUND MOTIONS – SINGLE STOREY AND MULTI STORIED STRUCTURE</b>	<b>45 - 55</b>
4.1	Introduction	45
4.2	Details of far fault ground motion	45
4.2.1	Characteristics of far field ground motion	45
4.2.2	Details of far field ground motions used in this research work	46
4.3	Performance of sliding isolation systems – Single storey structure	46
4.3.1	Results and Discussion: SDOF systems	46
4.3.1.1	Effect of geometry	46
4.3.1.2	Effect of coefficient of friction	47
4.3.1.3	Remarks	47
4.4	Performance of sliding isolation systems – Multi storied structure	47
4.4.1	Results and Discussion: MDOF systems	48
4.4.1.1	Effect of geometry	48
4.4.1.2	Effect of coefficient of friction	48
4.4.1.3	Effect of modal participation	48
4.4.1.4	Remarks	49

<b>Chapter 5</b>	<b>PERFORMANCE OF SLIDING ISOLATION SYSTEMS SUBJECTED TO NEAR-FIELD GROUND MOTIONS – SINGLE STOREY STRUCTURE</b>	<b>56 - 101</b>
5.1	Introduction	56
5.1.1	Characteristics of near-field ground motion	56
5.1.2	Magnitude scaling of response spectra of near-field ground motion	57
5.1.3	Magnitude scaling of the forward rupture directivity pulse	57
5.1.4	Narrow band rupture directivity model	58
5.2	Details of near-field ground motion	58
5.3	Performance of sliding isolation systems	58
5.4	Limitations of constant coefficient of friction and necessity for variable coefficient of friction	59
5.4.1	Mathematical formulation for variable coefficient of friction	61
5.4.2	Verification of effectiveness of variable coefficient of friction	62
5.5	Results and Discussion	63
5.5.1	Time history response	63
5.5.2	Effect of geometry	64
5.5.3	Effect of coefficient of friction	65
5.5.4	Effectiveness of variable coefficient of friction	65
5.5.5	Remarks	65
<b>Chapter 6</b>	<b>PERFORMANCE OF SLIDING ISOLATION SYSTEMS SUBJECTED TO NEAR-FIELD GROUND MOTIONS – MULTI STORIED STRUCTURE</b>	<b>102 - 138</b>
6.1	Introduction	102
6.2	Performance of sliding isolation systems	102
6.3	Results and discussion	103
6.3.1	Time history response	103
6.3.2	Effect of geometry	103
6.3.3	Effect of coefficient of friction	104
6.3.4	Effectiveness of variable coefficient of friction	104
6.3.5	Effect of modal participation	104
6.3.6	Remarks	104
<b>Chapter 7</b>	<b>PERFORMANCE OF SLIDING ISOLATION SYSTEMS SUBJECTED TO LOW FREQUENCY GROUND MOTIONS – SINGLE STOREY STRUCTURE</b>	<b>139 - 204</b>
7.1	Introduction	139

7.2	Details of low frequency ground motions	140
7.3	Performance of sliding isolation systems	141
7.4	Results and discussion	141
7.4.1	Time history response	141
7.4.2	Discussion: Narrow band low frequency records	142
7.4.2.1	Effect of geometry	142
7.4.2.2	Effect of coefficient of friction	142
7.4.2.3	Effectiveness of variable coefficient of friction	142
7.4.2.4	Remarks	142
7.4.3	Discussion: Medium band low frequency records	143
7.4.3.1	Effect of geometry	143
7.4.3.2	Effect of coefficient of friction	143
7.4.3.3	Effectiveness of variable coefficient of friction	144
7.4.3.4	Remarks	144
7.4.4	Discussion: Broad band medium frequency records	144
7.4.4.1	Effect of geometry	144
7.4.4.2	Effect of coefficient of friction	144
7.4.4.3	Effectiveness of variable coefficient of friction	145
7.4.4.4	Remarks	145

**Chapter 8 PERFORMANCE OF SLIDING ISOLATION SYSTEMS SUBJECTED TO LOW FREQUENCY GROUND MOTIONS – MULTI STORIED STRUCTURE 205 - 267**

8.1	Introduction	205
8.2	Performance of sliding isolation systems	205
8.3	Results and Discussion	205
8.3.1	Time history response	205
8.3.2	Discussion: Narrow band low frequency records	206
8.3.2.1	Effect of geometry	206
8.3.2.2	Effect of coefficient of friction	206
8.3.2.3	Effectiveness of variable coefficient of friction	206
8.3.2.4	Remarks	207
8.3.3	Discussion: Medium band low frequency records	207
8.3.3.1	Effect of geometry	207
8.3.3.2	Effect of coefficient of friction	208
8.3.3.3	Effectiveness of variable coefficient of friction	208
8.3.3.4	Effect of modal participation	208
8.3.3.5	Remarks	208

8.3.4	Discussion: Broad band medium frequency records	209
8.3.4.1	Effect of geometry	209
8.3.4.2	Effect of coefficient of friction	209
8.3.4.3	Effectiveness of variable coefficient of friction	209
8.3.4.4	Remarks	209
<b>Chapter 9</b>	<b>CONCLUSIONS</b>	<b>268 - 271</b>
	<b>REFERENCES</b>	<b>272 - 279</b>
