

List of Figures

Figure 1.1	Feedback control scheme of passive control system	6
Figure 1.2	Feedback control scheme of active control system	6
Figure 2.1	Typical acceleration and displacement spectra	27
Figure 2.2	Behaviour of fixed base and base isolated structures under ground motion	27
Figure 2.3	Laminated rubber bearing system	28
Figure 2.4	New Zealand bearing system	28
Figure 2.5	Pure friction system	28
Figure 2.6	Friction pendulum system	29
Figure 2.7	Free body diagram of sliding surface showing forces at point of contact	29
Figure 2.8	Frequency and restoring force characteristics of VFPI and FPS ($\mu = 0.02$, VFPI: $d = 0.3\text{m}$, $b = 0.09\text{m}$; FPS: $R = 1\text{m}$)	29
Figure 2.9	Comparison of geometric shapes for various isolators	30
Figure 2.10	Resilient-friction base isolator	30
Figure 2.11	Electric de France base isolator	31
Figure 2.12	Sliding resilient friction base isolator	31
Figure 3.1	Lumped mass model with isolator	44
Figure 3.2	Modal masses attached to base mass	44
Figure 3.3	Analytical model of multi storied structure with base isolator	44
Figure 4.1	Time history of El Centro 1940, N-S component ground motion	51
Figure 4.2	Response spectra for El Centro 1940, N-S component ground motion	51
Figure 4.3	Responses normalized with that of FPS ($T_b = 2\text{s}$) for SDOF system subjected to El Centro 1940 (N-S) earthquake, ($\mu = 0.05$)	52
Figure 4.4	Responses normalized with that of FPS ($T_b = 2\text{s}$) for SDOF system subjected to El Centro 1940 (N-S) earthquake, ($\mu = 0.1$)	53
Figure 4.5	Responses normalized with that of FPS ($T_b = 2\text{s}$) for MDOF system subjected to El Centro 1940 (N-S) earthquake, ($\mu = 0.05$)	54
Figure 4.6	Responses normalized with that of FPS ($T_b = 2\text{s}$) for MDOF system subjected to El Centro 1940 (N-S) earthquake, ($\mu = 0.1$)	55
Figure 5.1	Comparison of conventional and scaled response spectra of near-field ground motions	91

Figure 5.2	Responses normalized with that of FPS ($T_b = 2s$), (NFR, SDOF) ($\mu = 0.05$)	92
Figure 5.3	Responses normalized with that of FPS ($T_b = 2s$), (NFR, SDOF) ($\mu = 0.1$)	93
Figure 5.4	Plan of typical isolator with variable coefficient of friction	94
Figure 5.5	Force deformation history of VFPI for constant and variable coefficient of friction for NFR-01, $FVF = 2$, $d_f = 0.1m$	94
Figure 5.6	Time history graph for NFR-05, $\mu_1 = 0.05$, $\mu_2 = 0.1$, $d_f = 0.4 m$	95
Figure 5.7	Responses normalized with that of FPS ($T_b = 2s$), (NFR, SDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.1m$)	96
Figure 5.8	Responses normalized with that of FPS ($T_b = 2s$), (NFR, SDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.2m$)	97
Figure 5.9	Responses normalized with that of FPS ($T_b = 2s$), (NFR, SDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.3m$)	98
Figure 5.10	Responses normalized with that of FPS ($T_b = 2s$), (NFR, SDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.4m$)	99
Figure 5.11	Responses normalized with that of FPS ($T_b = 2s$), (NFR, SDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.5m$)	100
Figure 5.12	Responses normalized with that of FPS ($T_b = 2s$), (NFR, SDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.6m$)	101
Figure 6.1	Time history graph for NFR-05, $\mu_1 = 0.05$, $\mu_2 = 0.1$, $d_f = 0.4 m$	130
Figure 6.2	Responses normalized with that of FPS ($T_b = 2s$), (NFR, MDOF) ($\mu = 0.05$)	131
Figure 6.3	Responses normalized with that of FPS ($T_b = 2s$), (NFR, MDOF) ($\mu = 0.1$)	132
Figure 6.4	Responses normalized with that of FPS ($T_b = 2s$), (NFR, MDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.1m$)	133
Figure 6.5	Responses normalized with that of FPS ($T_b = 2s$), (NFR, MDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.2m$)	134
Figure 6.6	Responses normalized with that of FPS ($T_b = 2s$), (NFR, MDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.3m$)	135
Figure 6.7	Responses normalized with that of FPS ($T_b = 2s$), (NFR, MDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.4m$)	136
Figure 6.8	Responses normalized with that of FPS ($T_b = 2s$), (NFR, MDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.5m$)	137
Figure 6.9	Responses normalized with that of FPS ($T_b = 2s$), (NFR, MDOF) ($\mu_1 = 0.05$, $\mu_2 = 0.1$ at $d_f = 0.6m$)	138
Figure 7.1	Acceleration response spectra for low frequency ground motions	195
Figure 7.2	Time history graph for LFR-06, $\mu_1 = 0.05$, $\mu_2 = 0.1$, $d_f = 0.4 m$	196
Figure 7.3	Responses normalized with that of FPS ($T_b = 2s$), (LFR, SDOF) ($\mu = 0.05$)	197

Figure 7.4	Responses normalized with that of FPS ($T_b = 2s$), (LFR, SDOF) ($\mu = 0.1$)	198
Figure 7.5	Responses normalized with that of FPS ($T_b = 2s$), (LFR, SDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.1m$)	199
Figure 7.6	Responses normalized with that of FPS ($T_b = 2s$), (LFR, SDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.2m$)	200
Figure 7.7	Responses normalized with that of FPS ($T_b = 2s$), (LFR, SDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.3m$)	201
Figure 7.8	Responses normalized with that of FPS ($T_b = 2s$), (LFR, SDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.4m$)	202
Figure 7.9	Responses normalized with that of FPS ($T_b = 2s$), (LFR, SDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.5m$)	203
Figure 7.10	Responses normalized with that of FPS ($T_b = 2s$), (LFR, SDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.6m$)	204
Figure 8.1	Time history graph for LFR-06, $\mu_1 = 0.05, \mu_2 = 0.1, d_f = 0.4 m$	259
Figure 8.2	Responses normalized with that of FPS ($T_b = 2s$), (LFR, MDOF) ($\mu = 0.05$)	260
Figure 8.3	Responses normalized with that of FPS ($T_b = 2s$), (LFR, MDOF) ($\mu = 0.1$)	261
Figure 8.4	Responses normalized with that of FPS ($T_b = 2s$), (LFR, MDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.1m$)	262
Figure 8.5	Responses normalized with that of FPS ($T_b = 2s$), (LFR, MDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.2m$)	263
Figure 8.6	Responses normalized with that of FPS ($T_b = 2s$), (LFR, MDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.3m$)	264
Figure 8.7	Responses normalized with that of FPS ($T_b = 2s$), (LFR, MDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.4m$)	265
Figure 8.8	Responses normalized with that of FPS ($T_b = 2s$), (LFR, MDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.5m$)	266
Figure 8.9	Responses normalized with that of FPS ($T_b = 2s$), (LFR, MDOF) ($\mu_1 = 0.05, \mu_2 = 0.1$ at $d_f = 0.6m$)	267
